Washington Merry-go-round

Washington, D. C. BEHIND RAF RAIDS Few people outside the inner circle know it, but the bombing raids on Bremen, Cologne, Essen, have been accomplished in part through the largeness of Ed Stettinius Jr., who long ago saw the importance of high octane gas and demanded that the administration start large scale production...

The other commodity was high octane

gasoline, without which the current bombing raids could not take place. One bomber takes about 1,000 gallons of fuel to fly to England to Germany and back, so with 1,000 bombers staging a raid, 1,000,000 gallons of fuel is used up in one night.

U. S. PRISONERS IN BATAAN

The Undersecretary of the Interior, Jack Dempsey has taken up with the American Red Cross the problem of getting a Red Cross representative in Manila to look out for U. S. prisoners from Bataan and Corregidor.

So far, the Japs have not permit-

ted a Swiss Red Cross representative in Manila, though they have admitted Swiss representatives to Tokyo, Shanghai and Hong Kong. No excuse has been given by the Japs for not permitting a Swiss representative in Manila, but U. S. officials presume it is because they don't want anyone from the outside world to see what is going on there.

ROYAL PEEKS CONFERENCE

At King Peter's conference with the press, the Jugoslav monarch was completely polite, though admittedly the camera men fazed him a bit. With characteristic zest he monopolized the proceedings with popping flash-bulbs.

"One that stands out is your

friendliness," he answered promptly. "Everywhere I have gone I have noticed that."

"Does that include photogra-

phers?" "Well, they are persistent, aren't they? I would mind if they were, but keep shooting off things in my face."

TANKER-SAVING PIPELINE

American automobils owners don't know it, but indirectly they help the British to thank for the final decision to build a new pipeline from the South to the Middle West. Secretary Ickes had been urging construction of this pipeline for more than a year—always being rebuffed by the War Production board.

Part of Ickes' argument was that

it was foolish to waste the American tankers by having them carry oil all the way to England from the Gulf of Mexico. And the other hand, tankers could load oil and gasoline at a Middle Atlantic port, they could save 1,000 miles of travel and reduce the exposure to submarine attack. Tankers are getting scarce these days, and the shorter the distance they have to steam, the more trips they can make.

Ickes put forth this argument

emphatically at the last hearing before the War Production board, but was rebuffed by Lieut. Gen. Brehon Somervell, head of the army's service of supplies. Somervell's objection was the idea that England was hard up for oil or gasoline, said he had just returned from a year—always being rebuffed by the War Production board.

Ickes made no immediate reply,

but called the British government. The British were boiling mad, and the reply he received clinched the matter. The War Production board decided Somervell was right, and that about British oil supplies. The pipeline was ordered built.

MERRY-GO-ROUND

Capital insiders are betting that before the tax bill finally emerges from congress it will contain some kind of provision for compulsory war savings as an anti-inflation measure. Secretary Morgenthau has been willing to take, but recently of former OPA boss William Knudsen, in his new role as a lieutenant general in the army, has been ordered to war plants and in many of them he has recommended changes which have increased production.

Dried Vegetables

Easy to Prepare

Homemakers who dried fruits and vegetable last summer will find them easy to prepare. For most vegetables, such as corn, snap beans and dried beans, soaking to restore plumpness is the first step, length of time depending on size of pieces and variety. Leafy vegetables may be dropped directly into boiling salted water and cooked in a covered pan for 10 to 20 minutes, or until tender.

To soak, use only enough water

for re-absorption and for cooking. The vegetables may be served with seasoning, or used in any favorite way. Dried fruits should be washed; then covered with water to soak for about an hour. Hard dry fruits, as blackberries, may require a longer time, but it is important to remember that too long soaking draws out

much of the flavor. Cooking should be short and slow, and all the liquid used, according to the Kentucky College of Agriculture and Home Economics.

BUILDING fortresses and all of the other equipment for our armed forces has made huge demands on electric power—needs which have been amply filled, for there is no shortage of electric power capacity for both war and civilian requirements.

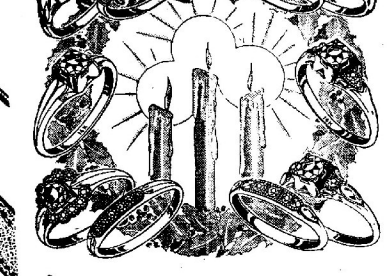

The shortage that exists is in natural resources from which electricity is made and in equipment and critical materials for its use.

The Government urges you to voluntarily conserve fuel, manpower and critical materials by curbing waste of coal, petroleum, electricity, gas, water, communications and transportation. Coupled with this request is a warning that you should use the electricity you need for society and health, including straight conservation.

THE word and the most misused word and what should be the correct word in the language is the word "best." This is a word that lowers more ground than we can follow, using an airplane and a telescope.

By this we mean such phrases as "the best team," "the best passer," "the best receiver," "the best kicker," "the best line," referring to football. For example, some days ago Major Jablonski, one of the leading Army coaches, rated Angelo Bertelli of Notre Dame as "the best passer" before 1935.

Loe Little, a Louisville naturally teamed with Paul Gervais of Columbia, Best of the past season's players. But what about Frankie Sinkwich of Georgia or Eddie Brock of Georgia Tech? Or Glenn Dobbs of Tulsa?

The Top Man Football's three best players are Sammie Baugh, Dick Lusk and Dick Luckman. You can have them in any order so long as Baugh is No. 1.

Back to the Collegians How many would you bet and pass with against such teams as Minnesota, Alabama, Wisconsin, Ohio State, Georgia, Georgia Tech or Notre Dame?

Hard to Compare It takes no starry-eyed expert to announce that Boston College and Alabama have two of the country's greatest lines, including depth of material. They can't be stormed along the ground—just too many big, fast men.

OFFICIAL ORGAN FOR FLOYD COUNTY, KY.

Floyd County After the War

THE business of providing war production centers coal and natural gas is the only salvation, even now in days of plenty, of this section from the depths of a business depression.

What of post-war prosperity can this section then expect unless new industries are located here?

There may be some shortage of manpower around the mines and in the Eastern Kentucky gas field. But they're getting along nobly with the men they have.

Subsidies, Nothing New In American Economic Life

That government subsidies far from being new to the United States, have played a prominent role in American economic life is revealed by a brief survey of the nation's development.

The first Congress in 1789, passed a law in aid of the merchant marine through remission of a percentage of customs duties on imported goods.

Railroads have been large beneficiaries of government subsidy. By June, 1941, the federal government had donated 130,401,000 acres of land.

IT WASN'T HER SON Editor, The Times: I wish to ask you to investigate and see what position McDowell was deferred by the Pikeville mines.

LETTER OF APPRECIATION—WHICH WE APPRECIATE

I have been reading the weekly issue of THE TIMES ever since I've been in the service.

I enjoy the column in the paper, "Floyd County Goes to War."

EVERY week I look forward to receiving THE TIMES because it gives me an ease of mind and also gives me a picture of real life back in Floyd county where I am hoping to return soon.

those home from the war and production fronts. Agriculture such as we have in Floyd county holds forth no hope for employment of any sizeable number of workers.

All this would seem to indicate that business men of Floyd and neighboring counties should do well to begin, now some post-war planning for themselves if they are not willing to let the whole matter slide back into the hands of W.P.A. PWA or some other form of work-relief.

Floyd county has the coal and gas for a job of post-war production needed. It has the water power, adequate electric power, an arterial highway and other year-round roads connecting with it.

This coal we have, for instance, is said to be of superlative quality for the manufacture of by-products. The post-war era is expected to be an age of by-products. Scores of by-products have already been developed from coal, and these are destined to play a leading role in the reconstruction of a war-torn world.

The natural resources are here, and, too, the workers. Then why should it be necessary for these natural resources to be shipped north or east for processing? Why not here at home?

Saving Paper, Work

Beginning yesterday (Wednesday), all B and C grade, 1942-43, tax books issued were designated B-2 and C-2 and the coupons therein have a value of five gallons instead of the two-gallon and one-gallon issued previous to that date.

The effect is simply that fewer coupons will be issued and permitting the use of the usual amount of gasoline. Holders of B and C coupons will continue to find their coupons worth only two gallons each.

LABOR STRIFE LOSSES TOLD

86,831 Man-Days Lost in Strikes, Official Says

Losses in Kentucky in 1942 because of labor strife totaled approximately 86,831, William C. Burrow, Commissioner of Industrial Relations, said today.

According to Burrow, the vastness of the disturbance makes it impossible to state the exact figures on the general strike, but reliable reports from firms throughout the state reveal that approximately 15,388 men were involved and 83,221 man-days were lost in these strikes alone.

The only other actual strike which occurred was in a mining corporation earlier in the month. It involved the employ of a company claimed that the scales being used were defective and they were not getting the correct weight, thus reducing the smaller wages. This strike involved 400 men and 3,600 man-days lost before a settlement was reached by the State Conciliation Service.

Two controversies arose in construction firms, one in the wholesale-retail classification, and one in services. However, amicable adjustments were made in these cases," Mr. Burrow added, "and a loss of time was avoided."

Safety Features Suggested For 4 Kentucky Coal Mines

Commending numerous safety features observed in four Kentucky coal mines during recent routine inspections, federal coal mine inspectors also have suggested additional protection for life and property in formal reports transmitted to the mine operators. Dr. R. B. Seyer, director of the Bureau of Mines, which informed Secretary of the Interior Harold L. Ickes.

The mines, employing a total of 1,180 men and producing nearly 6,000 tons of coal daily, are the Easton Coal Corporation's McVey mine, the daily output of 100 tons of coal, Inspector A. V. Paul recommended improved ventilation, after blasting, timbering, and haulage practices, and better control of dust. Air in most working places was inadequate, and Paul outlined improvements needed to increase the volume. Smoking should be prohibited underground and tests for gas should be made at regular intervals with a permissible safety lamp, he said. The Bureau representative

The GREAT Importance of SMALL Details.

IN FUNERALS, innumerable small items must receive the experienced attention of the conscientious funeral director. The important details that go into the making of a memorably handled service are so unobtrusively handled that seldom is any thought given to them by one untrained in such matters.

WE PERSONALLY DIRECT each funeral with the same painstaking consideration, regardless of how much or how little is spent.

It costs no more to call us.

LET'S KEEP UP THE GOOD WORK

THIS community has every right to be proud of the way it is meeting the appeal for more pulpwood. We are proving that we can get out the wood. Now let's keep it coming!

This war isn't won yet—not by a long shot. Our boys will be fighting for quite a while. They will be needing ammunition, food, medical supplies—and all these things that are shipped in paperboard containers are made from pulpwood.

Pulpwood is our wartime job. Pulpwood can still be a bottleneck, holding up America's war effort. Our responsibility is to see that it does not. No boy shall die because we have failed.

Both boards bearing the names of these worthy men on the Floyd County Honor Roll are receiving competitors here. The names appearing thereon are taken from the records of the county's two draft boards, but there are many who volunteered from this county whose names have not been listed with the draft boards.

So that parents and other relatives of service men may know the names of those listed by the two draft boards, and so that they may supply missing names, the list of names accredited to the local boards are published. Names of service men not listed here as they are published weekly in a group from the several communities of the county, should immediately be supplied to Mr. F. C. Hall, Prestonsburg, Ky. Lonesome Pine Council In Annual Dinner At Jenkins, Ky.

Annual dinner meeting of Lonesome Pine Council, Boy Scouts of America, was held Tuesday evening, last week, at the Methodist Church, Jenkins. One hundred thirty-five persons were present, representing all sections of the Lonesome Pine Council.

The speaker of the evening, Col. Charles E. Wood, of Cincinnati, has been identified in Scouting in Region Four, for many years serving in the capacity of deputy regional executive in Kentucky, Ohio, West Virginia and Virginia. He emphasized the fact that Scouting has long been one of the young men who carried important burdens in Scout work. He reminded his hearers that the Scout organization was not the only one that had had this experience. "The older men," said Col. Wood, "must step into the breach and keep intact these organizations and activities which go to make up the life that these boys knew before the war."

John B. DuPuy, chairman of the Nominating Committee, presented the following slate for the year 1944, which was unanimously elected:

Harry E. Green, Hazard, president; R. L. Gordon, Hazard, John O. Green, Hazard, John Miller Pikeville, E. R. Price, Wheelwright, Dr. W. G. Burke, Grundy; Harry LaViers, Paintsville, M. H. Porter, Jenkins, Dr. V. S. Seitzer, Pennington Gap, Va., H. W. Meador, Big Stone Gap, Va., vice-presidents; J. B. DuPuy, Pikeville, treasurer and Scout commissioner.

Members-at-large: Smith Williams, Bonnie Blue, Va.; Rev. Alexander J. Norton, Va.; P. J. Atkins, Norton, Va.; Dr. Thomas Kell, Norton, Va.; Rush Adams, Dantz, Va.; Wm. McCall, Clintwood, Va.; Ewood Bauske, Lebanon, Va.; Edna F. Hind, George Bush, Prestonsburg, O. N. Evans and J. M. Taylor, Paintsville; J. S. Farinash, Jenkins, Dr. A. E. Morgan, Hazard, Walter P. Walters, Pikeville.

During the dinner a Scout first-aid team staged a first-aid demonstration. This group of boys, from Troop 9, Wheelwright, recently won first place in a Scout first-aid contest held at the Big Sandy-Elkhorn Court Mining Institute meet.

Churches from 2 States Are Represented Here At Recent Convention

The Thanksgiving Holiness Church here was attended by delegations from Logan and Williamson W. Va., McAndrews and Geo. Ky., as well as by many local church people.

The morning sermon on "Divine Love" was delivered by the Rev. Glenn Peterson, of McAndrews. The noon meal for those attending was sponsored at the parsonage here by members of the Pilgrim Holiness Church and their friends.

The afternoon session was begun at 1 p. m., with a prayer service at the courthouse for men in the service, and more than 100 were present. At 6:45 the young people's service was led by the Rev. Howard Hall. The closing sermon, delivered at 7:45 by the Rev. G. W. Allen, was on the topic, "Eternal Hell and Souls Pleading God."

after Edward R. Burke, president of the Southern Coal Producers Association, had reassigned vigorously his opposition to the Ickes-Lewis pact. UMW district presidents took a poll and agreed to sign with the Southerners excepted.

The Ickes-Lewis agreement, under which the miners are being paid while the mines are in government possession, considers underground travel time as part of the working day and pays for it at a rate of 66-2/3 cents an hour before 40 hours have been worked in any week and \$1 an hour for the rest of the week.

The agreement assumed 49 minutes of travel time daily.

Burke maintains travel time in the south is much more than 45 minutes and that when this is officially determined the added travel time will cut into the actual hours spent in productive work.

He insisted on a contract guaranteeing eight hours of productive work daily. The Southerners were willing to pay the same weekly wage, \$57.00, as the miners now are getting, but not to pay for the travel time at a definite rate as part of the working day.

prisoners of war as well as to maintaining USO stations for the benefit of service men. At that time the UMW changed coal operators and the public in general to do as much for this cause.

Their contribution to the blood plasma fund is expected to be \$220.

In addition to the \$220 reported as having been contributed locally last week, Mrs. Winifred F. Johns, chairman of the DAR committee conducting the drive, said approximately \$115 more has been realized.

"At Martine's Mrs. Johns said, 'a man came forward with \$2, saying his son had been wounded, had received blood plasma and so the boy and his folks at home know what it means when life hangs in the balance.'"

All contributions should be sent to Mrs. Evelyn J. Salisbury, treasurer, John Graham Chapter, D. A. R., 38 First Ave., Prestonsburg.

HOME FROM GREAT LAKES

Robert Spradlin, son of Mr. and Mrs. R. L. Spradlin, of Dewey, was here this week on leave from the Great Lakes Naval Training Station after completing "boot" training. He was the guest here of his aunt, Mrs. Bess Williams, and also visited his sister, Mrs. Carl Dingus, and Mr. Dingus, at Lexington before returning to Great Lakes Thursday.
