LETTERS TO THE EDITOR

FORMER MINER WRITES HOME Editor, The Times:

As I am a reader of THE TIMES a citizen of Prestonsburg and a voter in my Old Kentucky Home, I am writing this for my old friends in Floyd county and two of my old pals in Wayne, Noble and Boone. I read their articles in THE TIMES and get a big kick out of them. And Shikepoke's, too.

Now I wonder if a man can honestly vote for Dewey and feel safe for a good, honest living for his family. Now I don't want anyone to know that I don't admire the mine workers and their leaders just as much as I always have. But I do hope that Labor will stick by our great President who has made it possible for Labor to organize and demand a decent wage so their families could enjoy life as well as the people in the higher standards of life.

Mr. Hoover in his speech last night talked of Business and Labor. But he didn't say anything about organized labor. I don't think the C. O. P. ever had, or ever will, stand by Labor as they should. They haven't proved it yet.

What Mystery Unveiled!

What Houseless! Officially defining a term that has often become a matter of debate in Floyd County, well represented in the past with a full quota of road-houses and honky-tonks, Charles F. Backus, Jr., commissioner of alcoholic beverage control, in a circular letter from Fankfort addressed to 2125 "all retail beer licensees," warned that the beer sale at dancehalls, roadhouses and other places outside corporate limits would be rigidly enforced.

When Actions Speak Louder Than Words

The patriotic manner in which telephone men and women have carried on since Pearl Harbor speaks louder than words. When started telephone workers were already in the midst of the greatest construction program ever undertaken. As war progressed their job grew more complicated. However, every war telephone service demand was met on or ahead of schedule, though it meant working long extra hours day after day.

While doing this tremendous war job, the urgent telephone needs of the public were not forgotten. There are today more than 500,000 more telephones in service in the Southern Bell territory than in 1940, and service is being maintained in spite of the fact that nearly one-third of our male employees are in the armed forces. Telephone operators are now completing more than 450,000 more calls each month than in the summer months of 1940.

Accepting their responsibilities as citizens, telephone folks have purchased millions of dollars of War Bonds and are continuing to invest more than ten per cent of their regular wages every month in bonds. You will find them doing Red Cross work—nurse's aid work—donating their blood—in fact you'll find telephone folks in nearly every civic movement designed to aid in our war effort and the betterment of the communities in which they live.

Telephone workers have accepted their wartime responsibilities, appreciating the vital part they have in the successful prosecution of the war—shouldering their tasks cheerfully and unselfishly as the men in arms shoulder their guns.

No, dear friends, this is neither a barber chair nor a snake charming act. It is the 1869 idea of air conditioning exactly as shown on the Little Rock grant to a citizen of South Bend, Indiana, in that year. As the chair rocks, a concealed bellows forces a cooling breeze through the tube, wafting it over the person of the portly party. Why the inventor used a snake's head at the end of the tube we don't know. Perhaps it was to keep the timid ladies from using grandpa's favorite chair.

Compare this with our modern air conditioning and all the other modern electrical devices that will be available in your "Home of Tomorrow." Then buy Bonds to help make that home possible. Kentucky and West Virginia POWER COMPANY Certainly! ELECTRICITY IS CHEAP But it must be conserved for War

Ack-Ack Crews Do a Good Job Covering Yank Landings

Crews Sleepless, Fight on Night After Night Clearing Air of Axis

By Ernie Pyle

NORMANDY—One of the most vital responsibilities during these opening weeks of our war on the Continent of Europe has been the protection of our unloading beaches and ports.

For over and through them must pass, without interruption, and in great masses, our buildup of men and material in sufficient masses to roll the Germans clear back out of France.

Nothing must be allowed to interfere with that unloading. Everything we can buy or make or do is thrown into the guarding of those beaches and ports. Allied ground troops police them from the land side.

Our two navies protect them from sea attacks by air. Our great air supremacy makes daytime air assaults rare and costly.

It is only at night that the Germans have a chance. They do keep pecking away at us with night bombers, but their main success in this so far has been in getting us awake and making us dig our foxholes deeper.

Here on the beachhead the falling flak becomes a real menace—one of the most fearful things I've known that happens in this war. Every night for weeks, pieces of exploded shells have come whizzing to earth within 30 yards of me.

And that is nothing but a warning of what can happen in an unexploded ack-ack shell burst itself so close to me that I was thrown from my tent.

A good portion of our army on the beachhead now sleeps all night in foxholes, and some of the troops have swung over to the Axis beachhead custom of building dugouts in order to be safe from falling flak.

For a long time I have intended doing a series about the anti-aircraft gunners. I glad I never got around to it before, for here on the Normandy beachhead, our ack-ack crews are doing a job that is not permissible but I can say that right now we have many, many ack-ack soldiers on the beachhead and that by the time everything has arrived the number will be much larger.

And that is nothing but a warning of what can happen in an unexploded ack-ack shell burst itself so close to me that I was thrown from my tent.

Our ack-ack is commanded by a general officer, which indicates how important it is. His hundreds of gunners are ever alert. Planes that fly over their beaches. The gun positions are plotted on a big wall map in his command tent, just as the battle lines are plotted by infantry units. A daily score is kept of the planes shot down—confirmed, or not confirmed. Just as an example of the effectiveness of our ack-ack, one four-gun battery alone shot down 15 planes in the first two weeks.

Up to the time this is written the Germans don't seem to know exactly what they are trying to do in the air. They wander around all night long, usually in singles but sometimes in two-bbers, but they don't do a great deal of bombing. Most of them turn away at the last moment, just as an example of our 40-mm. guns. Our ack-ack men say they think the German pilots are yellow, but having seen the quality of German fighting for nearly two years now that is hard for me to believe.

Often they will drop flares that will light up the whole beach area, and then fall to follow through and bomb by the light of their flares. The ack-ack men say that not more than two out of ten planes that approach the beachhead ever make their bomb runs over our shipping. You are liable to get a bomb anywhere along the coastal area, for many of the Germans apparently just salvo their bombs and highball home.

It is actually a spectacle to watch the ack-ack in action when the Germans are indeed get-over the beach area. All the machine guns on the ships firing at the landing are turned on their red tracer bullets, and those on shore do too. Their bullets arch in all directions and fuse into six-shooting patterns. The lines of tracers bend and wave and seem like streams of red water from hoses. The whole area becomes a gigantic animated fountain of red in the black sky. And above all this are the splendid golden flashes of big-gun shells as they explode high up toward the stars.

The noise is terrific. Sometimes a motorcycle named "Char de Mort" which means "Char of Death," is pretty soon we will see jeep names named "Yvonne" and "Mlle Pette Cherie".

The names of a lot of the French towers in our area are tongue twister for our troops, so the towns quickly became known by some untranslatable application of Americanese.

"Ma Petite Cherie"—Is Now a Jeep in Normandy

It is the custom throughout our army, as you doubtless know, for soldiers to paint names on their vehicles. They have names on air planes, tanks, jeeps, trucks, guns and practically everything that moves.

Well, the boys have already started painting French names on their vehicles. I saw a jeep named "Bientot," which means "soon," and

"The Old Judge Says..." "Mary and I were just saying, Judge, how lucky we are here in America that we have so many natural resources to help us always. That's right, Jim. When war broke out we had no oil, we had steel, we had food, lumber, aluminum...practically everything we needed. There's one thing we didn't have...rubber. The enemy had that. But that didn't bother us for long. Soon American brains and industry had synthetic rubber by the tons rolling out of plants. That filled a critical need...you can't win a war without rubber."

ORDINANCE
(Continued from Page 4)
An Ordinance Providing for Rentals for the Use of the Municipal Sewerage System in the City of Prestonsburg, Kentucky, Fixing the Liability Thereof, and Establishing the Rate to be Collected and for the Rent to be Paid.

NOW, THEREFORE, THE COUNCIL OF THE CITY OF PRESTONSBURG, KENTUCKY, DOES ORDAIN AS FOLLOWS:
Section 1. Beginning with the month of August, 1944, each and every water bill, as determined under the present rate schedule, shall be reduced in the flat amount of twenty-five cents; and on the statement rendered to consumers such deduction shall be offset by the sewer rental charge of twenty-five cents.

Section 2. A copy of this ordinance shall be certified to the water commission of the City of Prestonsburg for its instruction and guidance in making such billings.
Section 3. This ordinance shall be in full force and effect after its adoption and publication.
Passed by the City Council and approved this 17th day of July, 1944.
E. P. ARNOLD, Mayor
City of Prestonsburg, Ky.

Section 4. In the event the owner or occupant fails to pay this said monthly sewer charge, then on the tenth day of the succeeding month the city shall have the right to cut off the sewer connection at the property line at its option. If not thus cut off by the city, the liability shall continue as out there until the use thereof is discontinued by the owner and occupant thereof and written notice of such fact given to the city.

Section 5. The following rate or rental shall be applied and paid in the city for service rendered by the municipal sewerage system, each consumer or user thereof shall pay a flat rate of twenty-five cents per month.

Section 6. The City of Prestonsburg shall not render any free service in connection with the operation of its sewerage system, and all sewerage rates herein established or hereafter established shall apply equally to all users of the system; no user of the system may be preferred in the collection or establishment of rates and all rates established shall apply equally to the class of services rendered for such rates.

Section 7. All bills for sewer service shall be paid by the tenth of the month following that in which the service was rendered and, if not paid by that time, a twenty (20) per cent penalty shall be charged for non-payment. Bills for such service shall be presented and collected at the same time and in the same manner as those for water service. In the event that said bills are not paid by the first of the third month following that in which the service was rendered, both sewer and water service shall be discontinued and a fee of \$2.00 shall be charged for the re-commencement thereof.

Section 8. All ordinances or parts of ordinances in conflict herewith are hereby repealed, and this ordinance shall take effect and be in force from its final passage and its approval by the mayor.

Passed by the City Council and approved this 17th day of July, 1944.

WAR BONDS

The proudest title in the Army

It consists of two simple words.
Yet every soldier who's worth his salt covets it.
This title is simply:
"Good Soldier."

It isn't just happenstance that so many women in the WAC have earned this title—the proudest in the Army.

For wherever Wacs are working, both here and overseas, there you find a job well done. And done with a spirit so gallant and fine that high Army officers everywhere say of the WAC...
"They're soldiers. Good soldiers!"

"Good Soldier"
