And wheat alone can solve the problem of feeding the world's hungry

+

Actually wheat has never been a large item in the brewing process—only $\frac{8}{10,000}$ of the entire U.S. wheat crop was used in 1945:

In accordance with United States Government policy, the brewing industry has used no wheat whatever since March 1, 1946.

The other grains used have been reduced by 30%-that is, to 70% of the 1945 amount.

Wheat alone can solve the problem of feeding the hungry. The grains to which the industry

is now restricted, are of a variety and grade not normally consumed by the people of the world as food.

LESS BEER AND ALE Altogether, the brewing industry is using 30%

- What the President's Famine Emergency Committee asks us all to do
- 1. Save and share wheat and fat products . . . Go light on all foods that take where, fais and oils-save breads, macaroni, cakes, cookies, pastrics and deep-fried foods. Use drippings for pan-frying. Save salad oil-use boiled dressings.
- oil—use bailed dressings.
 2. Buy and serve more plentiful foods . . . Balance diets with the more plentiful foods, such as potatoes, fresh fruits and vegetables.
 3. Warte NO Good. . . . Tress up inderly 1 diproxer for tomorrow. Make very cruit count with mella toxis, crumb-toppings, broad puddings and suffings. Take no more than you can eat. Clean your plate. Turn in unusable fat solvoge promptly.

less materials than in 1945. This results in a proportionately lower production. But since the current demand for beer and ale is about 25% greater than a year ago, the real shortage

Consequently, your dealer will not be able to supply you with all the beer and ale you would like. We know you will understand the reason for this.

Your attention is earnestly directed to the recommendations of President Truman's Famine Emergency Committee, which are summarized in the box below.

This statement tells in clear, simple terms what each of us individually can do to help during the emergency.
