Pointing out that telephone construction is extending to the cities and towns and rural areas throughout the state, Mr. McAlister said that the number of Southern Bell telephones through which Kentuckians make and receive their telephone calls has more than doubled in the nine years since 1939. There are now more than 230,000 Southern Bell telephones in the state.

On January 1, 1946, there were 21,079 people in Kentucky waiting for telephones whose installation had been delayed pending construction of new equipment. Since that time, Southern Bell has pushed its improvement program all more than 122,000 telephones were installed in the past 28 months through April, 1948. Yet the new applications for service have been coming in so rapidly that the waiting lists continue large, despite the record number of installations. Mr. McAlister said the demand stems from significant economic, industrial and agricultural progress in Kentucky which goes far beyond the aftermath of war.

COOK'S DOGS SWEEP BENCH SHOW OF PIKE FOXHUNTERS' ASS'N

Floyd county rounds owned by Roy Cook, of Wayland, did a fair job of spread-eagling the field at the annual bench show of the Pike County Foxhunters' Association at Betty last Saturday.

Cook's Kefsey Crow, showing in the puppy class up to 12 months of age, was adjudged the best puppy in the show and best in natural carriage, winning three blue ribbons, three dog collars and 150 pounds of dog food. Kefsey Crow's kennel mate, Jackie McClure, was declared the best derby pup as well as the best opposite sex in the show, for which she received one blue ribbon, a purple ribbon and a gold trophy. These two hounds ranked third as best matched pair.

With Flying Crane, owned by Reb Martin, of Demos, Cook's dogs also won as the best pack in the show.

Judging the bench show was Sheriff R. B. Brown, of Wayne county, West Virginia.

SPORTS AFIELD

Old cherished beliefs are worn like old school ties, but the person who discards tradition will be a better fisherman, claims Bill Wolfe, iconoclast among our modern-outdoor writers.

If you're of the wet-your-hands-before-unhooking a small fish school, you had better go back to school. The truth is that wet hands probably injure more hooked fish than any other factor, except bait taken deep in the throat.

A wet hand increases the difficulty of holding a fish. The angles applied more pressure and is apt to injure vital internal organs. A dry hand helps hold a squirming fish, with less pressure.

As part of an experiment conducted by the New Mexico Department of Fisheries to determine the chances of survival of undersized fish released after being caught, four anglers took, then freed 23 trout. Of that number, only 43 per cent died.

Sixty were caught on barbless flies and were handled with care (three died); 51 were taken on barbed flies, and no special care was used in removing them from the hook (three died); 60 were taken on bait and moderate care was exercised (two died); 81 were caught with bait and were allowed to lie in the sand and dirt for a few minutes before being removed from the hooks (two died).

As a result of these experiments it was assumed that released fish will survive under normal conditions if average care is exercised and no vital organ is injured.

WAYLAND WINS TWO GAMES

Garrett Edges P'burg Here As Rain Stops Scheduled Twin Bill

Wayland swept a doubleheader from Paintsville, Garrett defeated Prestonsburg in a single game with the second inning out here. Van Lear doubled Pikeville, Harold split a twin bill with Clear Creek and Elkhorn City. The lone run scored off this delivery was on an error which was followed by Adrian Blackburn's triple. Paul Harmon and Bradley hurried well for Prestonsburg but were victimized by two bad hops on balls hit to short. Prestonsburg was leading in the second inning of the second game, 3 to 1, when rain cut short the afternoon's activities locally. Mullins over the seven-inning route agreed upon for all Big Sandy league games in doubleheaders, allowed only one hit, walked two and struck out 10.

At Wayland-Paintsville was shut out in the first game, 5-0, with Adkins hurling four-hit ball for the winners. It was a scoreless game till the 15th when with two men down Harold doubled. Hobbs covered with a line drive two-bagger inside third, Adkins walked and Frady singled, the result being two runs. In the next inning Martin opened at bat with a double, Moore walked, Boyd popped up to first, but Ratliff followed this with a home run.

The second game was won by Wayland, 9 to 8, six errors in creasing by Wayland almost losing the game. Danny Butcher, Paintsville first baseman, started at bat with a double, Moore walked, Boyd popped up to first, but Ratliff followed this with a home run.

Harold won the first game over Clear Creek, 11 to 5, with a 10-hit attack, including three doubles, a triple and a home run, the latter by Hoyle. The second game, won by Clear Creek, 3-4, was played under protest from the sixth inning on. Clear Creek played erratic ball and outbit the second-place Harold team, 11 to 5, in the contest.

"Blue" Childers, schoolboy left-hander, started the second game here for Prestonsburg and was going along smoothly against Garrett when the rains came.

You Name it... the 'Jeep' does it

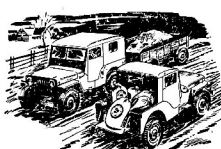

THE UNIVERSAL 'Jeep' DOES MORE FOR THE FARMER THAN ANY OTHER VEHICLE

• With 4-wheel drive for traction and steady pulling power in the field, the "Jeep" has a drawbar pull of 1200 lbs., operates almost any standard tilling or harvesting implement. Rear power-take-off runs power-driven implements from standard spline shaft drive.

• The "Jeep" can be used with the latest development in modern farming—a new hydraulic lift that raises, lowers or adjusts depth of implement while the operator remains comfortably seated. And of course it handles conventional pull-type implements, too.

• The Universal "Jeep" is for hauling and towing on or off the road in all kinds of weather. It carries up to 1200 pounds, pulls a braked load of 2½ tons at highway speeds.

• It provides mobile power anywhere on the farm, for operating many types of power-driven equipment such as separators, feed grinders, buzz saws, hammer mills, ensilage cutters and numerous others.

This message gives but a glimpse of the all-around, year-round usefulness of the Universal "Jeep". We invite you to see this versatile vehicle in action and let us prove that it does more different jobs than any other single farm vehicle. Call for a demonstration now—on your farm, with your equipment.

SHEDS DIRT... STAYS WHITE...

DU PONT HOUSE PAINT
CLEANS ITSELF!

Outside surfaces stay fresh and clean-looking when finished with DuPont House Paint. Dirt and grime can't get a grip—rains just wash them away!

SELF-CLEANING DuPont House Paint is so formulated that, at times goes by, a microscopically fine white powder forms on the surface. Heavy rains wash the powder away taking dust, and dirt with it, and leaving the surface clean and white again. Excessive accumulations of dirt (particularly in sooty industrial communities or in heavily shaded locations) may delay or interfere with this process. Because this "self-cleaning" is gradual, the

wearing qualities of the paint film are not abnormally affected.

SELF-CLEANING DuPont House Paint is so durable as it is beautiful... protects against rust, rot, and decay... gives lasting beauty and protection. Costs no more than ordinary paints—saves repainting bills! Call on a reliable painter for your painting jobs, and ask him to use DuPont House Paint!

any of Buick's all-coil springing which puts a pillow of deeply coiled steel at each wheel to soak up the bumps and ripples.

It comes from the softness of bigger, lower-pressure tires that cushion away road tremors and roughness—from the sure-footed, sverve-free steadiness of Buick's extra-wide Safety-Ride rims, widest in the industry.

And it comes in special measure from a brand-new engineering gem we call Vibra-Shielding which banishes vibration build-up.

Here for the first time you're freed from the motoring, fatigue brought on by tiny tremors piling up into bigger ones. Here your miles are made moss-smooth and quiet—long journeys become mere jaunts.

When better automobiles are built BUICK will build them

REASON FOR THE VIBRA-SHIELDED RIDE
Packed with scientific exactness, 3 fat cushions of special composition cradle the engine so as to control the vibration. Pressure, engine vibration is thus kept "out of line" with those that might come from other parts of the car. The result is to shield occupants against jarring vibrations, cut road noise, and engine vibrations almost imperceptible and motoring practically fatigue-free.

BUICK alone has all these features:

- * DYNALLOY DRIVE (optional)
- * TAPER-THRU STEERING (optional)
- * VIBRA-SHIELDED RIDE * SAFETY-RIDE RIMS
- * HI-PRESSURE FEDERAL POWER
- * ROAD-RIE BALANCE * RIGID TORQUE-TUBE
- * QUADROLEX COIL SPRINGING
- * SOUND-SORBER TOP LINING (Dura and Resilient)
- * DYNAMIC SPARK ADVANCE * FLEX-JET OIL PUMPS
- * STEER SMART MOODS * BODY BY FIBER
