## PROMINENT FLOYD CITIZEN FATALLY INJURED IN CRASH

**T. J. Hagans, 67, Dies Friday, Wife Seriously Hurt in Crash Near Allen**

### STATE TRUCK HIT

Accompanying his wife to the bedside near here of her mother, who is ill, T. J. Hagans, 67 years old, prominent Floyd county man, was fatally injured when their automobile crashed into the side of a state highway oil truck Friday morning at the intersection of the Mayo Trail and the Allen-Lackey highway near Allen. Mrs. Hagans suffered serious injuries but is believed to be recovering.

Mr. Hagans suffered three skull fractures, one at the base of the brain. He was rushed to the Beaver Valley hospital, Martin, where he died at 11 o'clock Friday night. He never regained consciousness.

Mrs. Hagans was driving the car, hurrying to the bedside of her mother, Mrs. Sallie Branham. Driver of the oil truck was a young man named Childers, of Pikeville. The automobile was practically demolished by the impact. Childers escaped injury.

Thomas J. Hagans was born March 31, 1869, at Langley, this county, the son of Dr. and Mrs. A. C. Hagans. His father was one of the best-known physicians ever to practice in this county. Mr. Hagans resided at Langley throughout his entire life, and was known to his every acquaintance as one of Floyd county's best citizens. He had for years been a devoted member of the Regular Baptist Church. Engaged in farming during the greater part of his life, Mr. Hagans several years ago became connected with the Kentucky West Virginia Company in the lease department, but had retired about two years ago.

Mr. Hagans was twice married—first, in August, 1888, to Miss Sallie M. Ratliff, who died June 9, 1932, and of this union five daughters and two sons survive: Mrs. Callie Martin, Northern; Mrs. Bertha Frasure, Shelbyana; W. M. Hagans, Prestonsburg; Mrs. Rebecca Salisbury, McDowell; Mrs. Eva Horner, Langley; John Hagans, Pikeville, and Mrs. Kittie Rowland, Langley. Following the death of his first wife, he was married to Mrs. Ora Branham Hopson, widow of Theodore Hopson.

Besides his widow and children, Mr. Hagans is survived by one brother, Hiram Hagans, of Langley, and three sisters, Mrs. Artie Ratliff, Greenup; Mrs. Millie Frasure and Mrs. Halie Frasure, both of Langley.

Funeral rites were conducted Sunday afternoon from the Wilson Creek Baptist Church, with approximately 1,500 friends and relatives of the deceased in attendance. Officiating ministers were Revs. A. L. Allen and C. F. Conn, of the Regular Baptist Church, and burial was made in the "Gar Hole" cemetery, near Northern, under the direction of E. P. Arnold.

## SEVENTH DISTRICT AWARDED MEETING

**Federation of Woman's Clubs To Meet in State Convention at Pikeville**

Mrs. E. R. May, of Langley, district governor of Kentucky Federation of Women's Clubs for the Seventh Congressional district, announces she has received notice from Mrs. Paul Wickliffe, state president, that the executive committee recently voted unanimously to accept the Seventh District's invitation to meet with its clubs at Pikeville, May 11 to 13, 1937.

The Seventh district has never entertained the state convention but is well able to do so and expects to meet at the meeting at the most. Mrs. May has been invited to be hostess. Mrs. May has been invited to be hostess. Mrs. May has been invited to be hostess.

## ALLEN MOTORCYCLISTS COOP CEREDO EVENTS

The boys of this section are supposed to know all about hoss-back ridin' and those of the urban areas are supposed to be expert in the handling of motorcycles and such-like vehicles. But, July 5, the Allen Motorcycle Club, competing with motorcyclists of the Tri-State area, almost made a clean sweep of the field in this type of riding.

Ray Cooksey, of Allen, led the field in the motorcycle rodeo held at the Ceredo, W. Va., fair-grounds July 5, and Ray, "Tuffy" Griffith, of Paintsville, a member of the Allen club, was second. In the motorcycle polo game, the Allen club won over Huntington, 6-4.

It was said this week that similar events may be held in this section soon.

## SEVEN PRISONERS IN JAIL DELIVERY

Seven of the 17 prisoners jailed by Prestonsburg police Saturday escaped from the city jail at 5 o'clock Sunday morning by the simple expedient of knocking a hole in the brick wall, using window weights for the purpose.

Names of six of the fugitives are Buster Gibson, Bruno Shepherd, Clarence Hale, Fred Goble, Cecil Turner and a man named Patrick, police said. Name of the seventh was unavailable. All had been booked on drunkenness charges. None had been re-captured Wednesday.

Local police have been establishing something of a record in the number of arrests made within the last few days. Monday, for instance, 20 persons were jailed.

## BURIAL OF INFANT

Burial of the infant of Mr. and Mrs. Estill Collins, of Hite, was made Monday near the home. The babe died soon after birth Sunday. Mrs. Collins is the former Miss Anna Stephens, of Hite.

Mr. and Mrs. C. B. Latta and son, Cliff, Jr., returned Tuesday from McKeesport, Pa., where they were guests of Mr. Latta's mother.

Rev. H. F. King and daughter, Miss Eleanor, returned last week from Charleston, W. Va., where they went to accompany the Rev. King's father from the hospital in which he has been a patient for some time to his home near Ripley, W. Va.

## DROUTH ENDED BY CONTINUED RAINS

**Garden Production in Floyd Believed Cut 50 Per Cent by Dry Weather; Hail Damages**

Rains falling almost daily since Thursday, last week, have definitely broken the drouth which, prevailing in this section for more than a month, had wrought heavy damage to crops and had farmers on the "uneasy seat" as they saw sources of water supply for their livestock dwindling to mere puddles.

It is estimated that the yield from garden this year in Floyd county has been cut by dry weather to 50 per cent of expectations. The damage to gardens is placed at around \$100,000.

Irish potatoes have suffered heaviest and the yield from this crop may go no higher than 40 per cent of normal production. Corn production depends much upon the remainder of the growing season.

In some sections of Right Beaver corn was badly damaged by hail during last Thursday's storm. A high wind accompanied the rainfall and two houses were blown from their foundations near Hueysville.

County Agent S. L. Isbell is commenting this week on the drouth, said that now is an excellent time to plant bunch beans and cabbage for late summer gardening.

## Sanders Elected Head of Legion In Tenth District

W. C. SANDERS

As five hundred veterans gathered to the largest in the district, the membership having increased about 800 per cent.

Committee leaders elected at the convention were Fred Amerson, of Paintsville; Joe P. Hobson, of Prestonsburg; C. H. Combs, of Hazard; Bill Stapleton, of Harburbury; C. V. Snapp, of Jenkins; Peyton Hobson, of Pikeville; A. B. Brooks, of Wayland; William Hess, of Van Lear; B. M. Rogers of Van Lear; Curtis J. Reed, of Fleming; Archie B. Sargent, of Whitesburg, and Albert Moore, of Salyersville. Arch Meredith of Jenkins was chosen delegate to the National Convention of the American Legion and Cyrus Cooper, of Paintsville, was selected as alternate.

This is the third consecutive year that Mr. Sanders has served as a Legion official. For the last two years he served as commander of Pikeville Post No. 83. During his two years as commander of that post he assisted in organizing the Sons of the Legion and the unit of the Ladies' Auxiliary and the Sons and Daughters' Drum and Bugle Corps of 45 pieces. He has also sponsored Boy Scout troops and saw the post grow from one of the smallest

## COURTHOUSE LOAN PROSPECTS BRIGHT

**WPA Will Make Outright Grant of 45 Per Cent of Total Cost of Undertaking**

Prospects of procuring from the Public Works Administration an outright grant of part of the funds necessary to construction of an addition and of repair of the Floyd county courthouse are excellent, it was said upon the return here Monday of County Attorney Forrest D. Short and County Clerk A. B. Meade, who filed with state WPA headquarters at Louisville the application for aid. The WPA will make a grant of 45 per cent of the total cost of the structure, the county officials were told. The county must supply the other 55 percent of necessary funds.

Supplying this amount, however, does not seem such an insurmountable obstacle at this time, since Mr. Archer, of the firm of Archer and Dean, architects, who planned the courthouse addition and repair, is certain the total cost of the building can be cut around \$30,000 below the lowest bid recently received by the fiscal court. Figures, available would indicate that the PWA, then, would donate around \$60,000 toward the project, leaving approximately \$70,000 for the county to raise.

Application for aid on this work is expected to be forwarded to Washington immediately, and prompt action on the matter is promised.

## SELF-INFLICTED WOUND IS FATAL

**MABEL WADDELL SUCCEUMBS TO REVOLVER BULLET FIRED HERE SUNDAY**

Miss Mabel Waddell, 23 years old, of Hueysville, this county, succumbed Wednesday morning at 1:45 o'clock at the Beaver Valley hospital, Martin, victim of a revolver bullet which she fired into her body Sunday afternoon at 1 o'clock while visiting at the home here of her sister, Mrs. Mitchell Thomas.

Mr. and Mrs. Thomas were at the home of a neighbor, across the highway from their residence, when the shot was fired. Miss Waddell gave no reason for the act. The .38-caliber bullet entered the right side of her abdomen, ranging down.

The young woman resided at Midas with her parents, Mr. and Mrs. William Waddell, and had been visiting her sister here for the past week prior to the tragedy. She was of a quiet, unassuming nature, and had a host of friends. Besides her parents, she is survived by the following brothers and sisters: Mrs. Russell Hall, Garrett; Mrs. Mitchell Thomas, Prestonsburg; Lawton Waddell, Eastern; Don Waddell, Moudie; Mrs. Jek Bentley, Glo; Mrs. M. H. Cooley, Lackey; Robert Waddell, Hueysville.

The body was prepared for burial by E. P. Arnold and was taken to the home of the parents. Funeral rites are to be conducted today (Thursday), with burial near Midas.

## MISS HOLBROOK AND MR. CLINE WED HERE

Marriage of Miss Irene Holbrook, Salyersville, Ky., and Mr. French Cline, of Williamson, W. Va., was solemnized here on Friday, July 3, the Rev. Adrian Davis officiating.

The bride is one of Salyersville's most attractive young women. Since her graduation from Salyersville high school, she has been a stenographer in the office of her father, who is secretary and treasurer of the Big Sandy Production Credit Association and of the Magoffin County Farm Loan Association.

Mr. Cline is a member of the firm of Cline Brothers, building contractors, and is well-known in this section. Both Mr. and Mrs. Cline are among the finest young people of this section, and have a host of friends. They will reside near Williamson, W. Va., it is announced.

## 27 FROM FLOYD ENTER U. OF KY.

At the close of the regular registration for the first term of the 1936 summer session at the University of Kentucky, a total of 1,624 students had enrolled for classes, making the second largest enrollment in summer school history at the University. An additional 60 students were expected to enroll for the special unit courses of two and one-half weeks each, according to information from the office of the registrar. The first term will end Saturday, July 18, and the second term starts the following Monday.

Heavier enrollment is expected the second summer school session over previous corresponding periods, as several popular courses have been changed from the first to the second terms, it was reported from the office of Dr. Jesse E. Adams, summer session director.

Among those registered at the University of Kentucky summer session from Floyd county are: Aaron J. Akers, Banner; Aster Kennett Akers, Amba; Harriett May Allen, Langley; Elizabeth May Baker, Langley; Oval Bingham, Prestonsburg; Lola Viola Burke, Betsy Layne; Charles Clarke, Alphoretta; M. V. Clark, Prestonsburg; Jesse Elliott, Betsy Layne; Chelmer H. Frazier, Cracker; Sherrill Frazier, Cracker; James Ballard Goble, Prestonsburg; Boone Hall, McDowell; Lorraine R. Harris, Emma; Nell Davidson Hays, McDowell; Abel M. Hughes, Floyd county; Mary Vivian Nash, Weeksbury; Scott Compton Osborn, Martin, Martin; Dr. Marvin S. Ransdell, Prestonsburg; Wayne Ratliff, Langley; Mrs. Wayne Ratliff, of Langley; Beecher Layne, Scutchfield, Water Gap; Bonnie Eloise Slade, Martin; Genevieve Kathryn Stumbo, Prestonsburg; Ishmael Triplett, Prestonsburg; Omar Virgil Turner, Langley, and Mrs. Franklin Webster, Estill.

## ACCIDENTAL BULLET VICTIM RITES HELD

**Automatic Pistol Discharge Fatal to Youthful Garrett Miner; Burial Made Saturday**

Funeral rites for Corbett Hollifield, 23 years old, who died July 2 at the Beaver Valley hospital from the effects of a bullet wound accidentally inflicted on the preceding Sunday, were conducted from the Methodist Church, Garrett, Saturday afternoon, the Rev. G. B. Allen and others officiating.

Young Hollifield was wounded by a bullet from a .45-calibre automatic, the missile passing through the lower part of his abdomen and thru his hip. He is said to have been working with the mechanism of the pistol and to have started to put it under his belt when the weapon discharged.

He has his parents, Mr. Saviving, surviving him are his parents, Mr. and Mrs. Alex Hollifield, three brothers and three sisters. He was employed at Garrett as a miner, and his funeral, directed by E. P. Arnold, was under the auspices of the United Mine Workers. Burial was made at Garrett.

## OUSTER OF HUNTER HELD EFFECTED AS CLAY DENIES PLEA

**Chief Justice Refuses Both Factions in Education Embroglio; Hunter Nominates Teachers Monday**

### APPROVAL REFUSED

Chief Justice Clay, of the Kentucky Court of Appeals, Tuesday refused Ballard Hunter continuance of the injunction issued in his favor by previous Appellate Court decision, at the same time refusing to issue an immediate mandate canceling the injunction.

This action returns Palmer E. Hall to office as County Superintendent, it is held generally. The 20-day stay of execution of the judgment of Judge Alcorn denying Hunter the injunction to prevent the board of education from removing him expires today (Wednesday), it was said.

Counsel for Mr. Hunter withheld comment but it was believed that he would vacate the office without further attempt to retain the post, bidding his time till September when the Court of Appeals is to act on his motion for re-hearing.

Superintendent Ballard Hunter Friday presented to the Floyd county board of education at its meeting here his nominations of 165 rural teachers and 140 teachers for the various consolidated schools of the county.

Though the board refused to take action on the teacher-nominations, Mr. Hunter said this week that those named by him would teach unless proved to the state department of education to be unqualified for teaching.

On the other hand, the three members of the board of education attending the meeting and failing to approve or reject the nominations were quoted as holding that nominations are not valid. One reason given that the nominations not valid was that the board was forced to name teachers, school term starts. Dr. J. Mrs. Dewey Osborne and Bailey were the board members attending the meeting.

Mr. Hunter urged the board designate Monday, July 16, for the opening of rural schools and the consolidated schools at Beaver, Dwale and Bonanza. Palmer L. Hall, controller for the Superintendentcy, said Tuesday that he did not know the term will open, that order would begin July 20 and that all the term may be begun on that date.

## RURAL ROAD FUND TRANSFER DELAYED

**Williams Tells Officials Highway Department Aid Needed for Left Beaver Road**

Members of the Floyd fiscal court who went to Frankfort last week to negotiate for the transfer of Floyd county's allotment of \$25,000 from the department of rural roads to the state highway commission to be used on the Left Beaver road were told by Cecil T. Williams, commissioner of rural highways that this move would be permitted if the highway department complete the part of the highway remaining unfinished after this amount is exhausted.

The magistrates, who hold that completion of this highway is of first importance in Floyd county road-building, were not given definite assurance that the highway commission will complete the highway but information gained while in Frankfort was encouraging.

Highway commission officials indicated that a definite answer in the matter would be given within a month. At the time fiscal court members were in Frankfort personnel of the commission itself had not been settled, and business transactions of the highway body was at a low ebb.

### THE GARDEN

#### EMERGENCY POTATOES

John S. Gardner, College of Agriculture

Because the spring crop of potatoes is short, and because there is a woeful lack of seed from which to grow a late crop, attention is being increasingly turned to using for seed the small tubers, among the potatoes now being dug. On the face of it, this seems a feasible idea, except for the serious drawback that such potatoes might not sprout in time to make a crop before frost came.

What is not generally understood is that after a potato becomes edibly mature, a certain length of time

must elapse before the tuber becomes ripe enough for the eyes to start sprouts. This is called the "rest period," which, for Irish Cobblers, is from 8 to 12 weeks, and for Bliss Triumphs, a week or two less.

There are several ways of shortening this period. One is "sun-greening," merely spreading the potatoes on a floor, so they receive direct sunlight for several hours a day, and daylight, the rest. After an interval, sprouts start; then, the potato should be planted. This method should shorten the rest period from two to four weeks, but that is not enough, unless the potatoes were to dig in June, and the fall season extraordinarily favorable and long. That is to say, late crop produced from sun-greened seed might not in-

clude many tubers large enough to use for the table, except optimum conditions prevailed. However, even the no table crop resulted, potatoes of seed size, excellent to plant in the spring to follow, might be made. Thus worthless potatoes might be turned to good account.

Another way to shorten the rest period is to use chemicals that induce maturity. Of all that have been tried, ethylene chlorhydrin and sodium triocyanate give most promise. Of these two, the latter is more reliable.

The methods for using these chemicals differ in some respects, but in these they are the same. The potatoes should be dug carefully, so as not to bruise or scuff them, and they "should be stored in air 30 days." They may be treated cut or whole, but whole potatoes succeed better.

In the ethylene method, 1 pint of the chemical is stirred into 4 gallons of water. In this solution, the potatoes are dipped to wet them completely. Then, put them into an airtight container and left for 24 hours, thoroughly to become permeated with the gas the ethylene sets free. The ethylene treatment has been more successfully used on Triumphs.

In the instance that triocyanate is the treating material, the procedure is to dissolve 10 ounces of the chemical in 4 gallons of water. Into this solution, the potatoes are left for 1 hour, after which they are planted. If economy of material is an object, the amount of triocyanate may be halved, but the soaking time doubled.

The ethylene solution would remain potent indefinitely, were it not for the evaporation of gas. Conservatively, the solution may be used on 10 lots of potatoes. The triocyanate solution becomes weakened through the absorption of the chemical by the tubers, but 4 lots may be successfully treated before a new solution need be made.

To promise just how much gain in sprouting time will result from these chemical treatments is not wise, except to say that, if everything goes well, sprouts will start within a week of the treatment. For reasons unexplained, rotting of the tubers may take place, seriously to affect the stand; from 20 to 50 per cent loss, for this reason, is not uncommon. The fact remains, however, that worthless potatoes may thus be used, and, if nothing more than a seed crop results, there is that much gain.

#### MARINES TO ACCEPT THIRTY-TWO RECRUITS

The quota of men to be accepted for service in the U. S. Marine Corps by the district recruiting office, Municipal Auditorium, Macon, Ga., has been set at 32, according to Major J. M. Tildesley, officer in charge at Macon. The men will be selected from among applicants from the states of Georgia, Alabama, Tennessee and Kentucky.

To qualify for enlistment applicants must be between 18 and 25 years of age, not less than 5 feet 6 inches nor more than 6 feet 2 inches in height, and must have completed one year in senior high school. Application blanks will be supplied to interested persons by the Macon recruiting office.

#### COURT GIVES RULING ON EMPLOYMENT OF TEACHERS

Frankfort, Ky., July 2—In an order written by Chief Justice William Rogers Clay, the Court of Appeals today held that a county board of education cannot be compelled to elect teachers or attendance officers before the start of a school term.

The decision was in the petition of Florence Hall, Marie Peit and Marv K. Daniel for an injunction to compel the Powell county board of education to employ them on recommendation of the county school superintendent of Education disclosed, were recommended for the positions by the retiring county superintendent, and the board failed to act on the recommendations until a new superintendent was elected. The recommendations of the former superintendent, the opinion held, were not binding.

#### Air Conditioning

—A BIG FUTURE!

• Still on the threshold of its real development, air conditioning offers great opportunities for trained men. It is possible to acquire this training through spare-time study, a practice that is being followed at this very moment by ambitious men throughout the country.

International Correspondence Schools

### Gold Medallion to Admiral Byrd Commemorates His Lonely Vigil

A SUPERBLY human note was struck at a recent dinner at the Waldorf-Astoria in New York City tendered by combined American Industry to Rear Admiral Richard E. Byrd—"in acknowledgment of his invaluable contributions to science and to pay tribute to those qualities of heart and spirit that make him universally admired and an inspiration to his countrymen."

During the course of the dinner at which the Admiral spoke briefly, for the first time, of the appalling experiences of his lonely vigil in the shadow of the South Pole, he was presented with a four and one-half inch gold medallion symbolizing American Industry's tribute to his heroic exploit.

The face of the medallion depicts the Admiral seated at the radio in his tiny advance weather station tapping out "All's Well" to Little America, while the reverse side bears the following inscription:

#### DICK BYRD—GALLANT GENTLEMAN

Due to a combination of unforeseen circumstances it became his duty as he saw it, to keep, alone, a six month vigil for meteorological observation at the world's southernmost outpost. Before the middle of the long Antarctic night he was stricken desperately ill from the poisonous fumes of a faulty oil stove. Survival seemed impossible. He deliberately chose to die rather than tap out an S.O.S. on his radio. In fact, he further squandered his strength and lessened his chance for survival by painfully hand-cranking his radio to keep his schedule and report "All's Well" to Little America, lest his silence cause his comrades to risk their lives coming to his rescue in the darkness. For months of the bitterest cold ever endured he hung precariously on the edge of the abyss. Untold suffering did not compel him to alter his decision. By a miracle he was spared.

#### WHEELWRIGHT NEGROES NABBED IN BURGLARY

Failure of a stolen automobile to run when it was expected to result a few days ago in the capture of Bill Jackson, 19, and A. J. Grimes, both colored, of Wheelwright, after

they are alleged to have broken into the commissary of the Utilities Elkhorn Coal Company at Virgie, Pike county, and also to have entered the Virgie postoffice.

When a nightwatchman found a strange car beneath an open window of the building, an investigation was instituted, revealing the fact that the auto belonged to Frank Mosely, Wheelwright negro. Officers found Mosely inquiring about his car, and shortly afterward the other two negroes were nabbed. Loot from the commissary consisted of dry goods and shoes.

## IT'S SMART TO BUILD A HOME Now!

"MY JOB is connecting service to supply electricity wherever it's needed, and believe me, I'm plenty busy these days. When people build a new house, remodel an old one, move to a new location, or want my help for any reason, I must be on the job. Generally, they are in a hurry to get the service.

"This is the time for building a home and I see by the papers that all over the country the procession has started after many years of delay. There is a home shortage 'most everywhere. While the building business was at a standstill, plenty of people married and started new families. They need homes and want homes for, after all, there's no place like home. And it's smart to build a home, at that, for they tell me if this thing they call 'inflation' comes along that building costs and rents will go out of sight.

"When you decide to build, give us a ring. We'd like to have a chance to help you plan your electric service. When you're ready for the service, I'll come arunning, for it always gives me a kick to see a new home going up."

This is the sixth of a series of advertisements presenting the people behind your electric switch.

DAN HEFNER

PRESTONSBURG, KY.

STAR DUST Movie Radio

IF YOU are among the many who never fail to tune in on Major Bowes' broadcasts on Sunday evenings, you'll be interested in the discussion of money matters that's going on.

The genial Major's contract expires in September, and the same sponsors want him again. So do others. He asked \$18,000 a broadcast, then cut it to \$15,000—twice what his old contract brings in.

As for the amateurs who appear on the program, they get five dollars an appearance. If they get the gong it's doubled. If they are good enough to land with a unit, they draw real money.

As soon as "The Garden of Allah" is finished the stars are going to scatter like spilled quicksilver.

Marlene Dietrich will go to London (she plans to put her little girl in school in Europe next year, which will mean their first separation for any length of time); Basil Rathbone will head for London also; Charles Boyer leaves for Paris, and Joseph Schildkraut for Austria. And as soon as they arrive, no doubt, they'll probably be summoned back to Hollywood for more pictures.

The wise picture star, when starting for a vacation, leaves no address.

When you see "The Good Earth" don't sympathize with the actors, thinking that they had to shave their heads for the picture.

The head of the make-up department at Metro, Jack Dawn, mixed up a dressing that would give the effect of shaved heads—and by having the actors use it, the company saved a lot of money.

Ginger Rogers has been in pictures for six years? She celebrated the anniversary just the other day. She still likes them. But the girl has unlimited energy; after working all day with Fred Astaire on dance routines for their next picture, she goes out dancing in the evening.

Ben Lyons and Bebe Daniels sailed for England the other day with their daughter Barbara, aged four and cute as she can be. Ben and Bebe will make personal appearances (they've been coining money doing it over here), and then take a vacation on the Riviera. They have more fun than almost any other married couple in Hollywood.

Fred Allen could journey to Hollywood and make pictures this summer if he wanted to; the offers have been rolling in thick and fast. But he has turned them all down. When he is broadcasting he works all week on each broadcast, and he feels that he's entitled to a rest when he goes off the air for the summer. So he'll vacation in his home town in Massachusetts—and probably pick up new material for his next series of programs.

Katharine Hepburn is taking no chances on her next theatrical appearance.

Signed with the Theater Guild to do "Jane Eyre" next fall, she insists on a preliminary out-of-town tour lasting six weeks, just to get her hand in.

It's rumored that Margaret Sullivan will also have a try at the New York stage, where she was doing very well indeed when the movies captured her, and she became a favorite of screen fans.

Robert Taylor's New York vacation remained hectic to the very end. Leaving a broadcasting studio after he'd been on the air, he was mobbed by a crowd that took 15 policemen to handle—and then one of the fans got away with his handkerchief, and another took one of Taylor's shoes, to remember him by!

UNCONFESSSED By MARY HASTINGS BRADLEY

CHAPTER XV—Continued

"What I think," Mitchell expounded, "is that she followed Nora up to find out what she could about the row that had been going on—her eyes wouldn't miss that. And I think she went away because Dan came in. I think Letty knew Dan was in it, somehow, all the time. But she sat tight."

"She would," Deck answered. "When Dan prompted her to ask for the cigarette case and feel of it, and have Clancy feel of it, he probably told her he was sure the diamond was hidden in it. She followed his lead all right, but when she saw how it worked out, when it came home to her just what the consequences were, when she heard him exulting over Deck's fate, then it all rather did for her for a moment. But only for a moment. Do our Letty that justice, Alan."

Deck nodded, unresentfully. "Oh, I could have fried in hell if that would have helped her get Dan."

"Donahay's talking to her now," said Mitchell. "She's pretty well shot to pieces, but I don't think she'll give Dan away."

Mitchell continued: "When Lella, here, brought out what Rancini had been up to with Anson—"

"That must have tickled Dan pink," Deck interjected.

I interrupted by asking Mitchell when he had first suspected Harriden.

His dark eyes twinkled. "Hard to say, now... Thought it was you, Alan, at the beginning, but I tried to keep an open mind... The radiator marks puzzled me... But I didn't see my way till I saw that play about the cigarette case and examined the cigarettes, and even then I didn't suspect the beginning of it—the andiron, the dummy on the bed. I kept bothering over Anson's testimony."

They spoke of insanity as the defense. Mitchell thought it would end in mistrial. Deck conjectured that with all Harriden's resources it would never come to trial.

"And I'm not so sure it wasn't insanity—the Anson part," said Mitchell. "No sane man would have choked that girl to death and put himself into such jeopardy over the little she had to tell... Well, he may pull himself together and fight it out. You may be the one tried, after all. Don't lose hope, my lad."

We could banter about it. Reaction was strong in us. There comes a time when you are drained of horror, when in sheer self-preservation you revert to what is normal and gay. And in spite of all my pity for that hard, desperate man upstairs, my compassion for poor dead Anson, I was feeling now a very lively sense of relief and self-rejoicing.

We ate all the sandwiches; we drank all the coffee and we smoked innumerable cigarettes. Then Deck went to get himself another drink, and Monty Mitchell and I sat there, still talking.

He told me that he declined to take back a word about my foolishness but

that he forgave it for the sake of my courage. "You stood up there, facing him, and put that scene together as if you were seeing it!"

He had stood there too. Beside me. Perhaps he was thinking of that, for he gave me a quick look and said, "By the way—how about that engagement of ours?"

"You were pretty sweet," I said. "Standing by." I realized that he had been beside me every moment in that house. I tried to say so.

"I'd like to take it on as a life job," he told me. And then, "I think I'm rather desperately in love with you, Lella Seton."

For a moment I just looked at him. His eyes, usually so gay with banter, held a bright, deep warmth.

"Am I too late?" he said, and it was strange to hear his voice sounding like that. "Is it Deck?"

I didn't say anything—I was too busy wondering at myself. For it was not Deck, the Alan Deck of my dreams, the man who had taken such possession of my sympathies. Deck was vivid, exciting, romantic—and he was ready, I felt instinctively, to play at love with me, to yield to a new glamor.

But I didn't want him. I was terribly sorry for him, for all the disillusion he had been through in his bitter passion for Nora Harriden; I was fiercely protective for him against any danger he might be in through her death, I was ready to lie for him, to steal those letters—

But Deck, as a man, had grown unsubstantial. He had simply not been there. He had shielded himself behind my explanations, he had been willing to use my sympathy on his behalf. He hadn't sprung to defend me as Mitchell had done; it hadn't been Deck who had crossed the room, before Harriden's glaring eyes, to put his arm through mine. The comfort of that touch I would never forget.

Oh, Deck had been everything he ought to have been, but Mitchell had been so much more. And there was so much more to Mitchell.

I didn't think I liked handsome men any more, desperate reckless men who ran to you for sympathy. I was cured of them. I liked men with force and character and steadiness, with bantering gaiety and dark, quizzical eyes.

So I shook my head violently about Deck.

"You mean that?" Mitchell's voice leaped out at me, almost incredulously. "He's such a taking devil! Lella—"

He checked himself; he didn't touch me or make any speeches. He just said quietly, "Don't be grateful—or anything like that. But—if you could manage to—to learn to love me—"

"I do. I do now," I told him as assuredly as if I hadn't just found it out an instant before. I am stupid about words; I couldn't say anything of what I felt to him. I only sat there, breathless, looking at him, feeling my own happiness and his.

And then Deck was back, his glass in his hand.

Monty jumped to his feet. "Here's a toast—we'll make it a loving cup," he cried and caught me by the hand, drawing me up beside him.

"To Lella—who loves a lawyer!" The glass in Deck's hand was motionless. He looked at me.

"No foolin'?" I looked at him. "No foolin'."

Deck put the glass to his lips. He took a long drink. "Well, I'm glad for you, Monty, old chap, and I'm damn sorry for myself... It's the hell of a world."

It was in the silence following that pronouncement that we heard the shot. The shot that Dan Harriden had fired into his temple as he leaned over his wife's body, the shot that he would rather meet than the courtroom with its publicity and scandal—the shot that was the only confession he ever made.

THE END

New and Simple Crochet

Pattern 5544

"Can anyone do it?" Most assuredly! It is a lovely rug, a matching foot-stool top or pillow for quick crocheting. Easy, six-sided medallions are done one by one, each flower a different color with background uniform or not, as you please. Sew them together and you're ready to begin the border crochet, going round and round with stripes of color used to break the background. Rug wool, rags or candlewicking may be used. In pattern 5544 you will find complete instructions for making the rug shown; an illustration of

Smiles

Speedy Age Biggs—I want you to be present at my golden wedding next week. Jiggs—Golden wedding? Why, man, you're not even married. Biggs—No, but I will be next week. I am engaged to Miss Goldrox.

Smiles

Cause Enough Neighbor—I wonder why your new baby brother cries so much. Bobby—Oh, I guess you'd cry too if all your teeth were out and your hair all off and your legs so weak you couldn't stand on them.

RIGHT MAN IN RIGHT PLACE

Chamois wet in cold water and wrung dry will polish mahogany furniture that has become cloudy. A little garlic rubbed over the broiler on which steak is broiled gives steak a delicious flavor. Never put hot foods in your refrigerator or ice box. Wait until they have cooled. Mayonnaise may be kept for several weeks in refrigerator if a tablespoonful of boiling water is added to it before bottling. Sandwiches may be kept moist for 24 hours if they are wrapped tight as soon as made, in waxed paper, then placed in a box lined with a damp cloth and covered with a cloth. Keep in a cool place.

You Wanted a Western...

In answer to many requests for a different and unusual Western story we're happy to announce the coming publication of...

GUNLOCK RANCH by FRANK H. SPEARMAN

HERE'S an exciting tale of Western ranch life. It has all the customary and necessary parts of a true-to-life Rocky Mountain story plus a lot of unexpected angles that will maintain your interest to the final sentence.

Jane Van Tambel is the heroine, an Eastern girl who comes out West to meet her father for the first time... and finds him a crook and thief masquerading under a cloak of respectability. The desire to turn against him is repressed until she meets Bill Denison, her father's mortal enemy. Love appears, and with it comes an emotional conflict that Spearman portrays with mastery. Should Jane Van Tambel turn against her father or renounce her love for Denison?

This thrilling novel starts in our next issue. Follow it for a wholesome treat!

OFFICIAL ORGAN FOR FLOYD COUNTY, KENTUCKY

\$1.50 Per Year

Payable In Advance

Entered as second class matter June 18, 1927, at the postoffice at Prestonsburg, Ky., under the Act of March 3, 1879

### THE SIX-YEAR TERM

The court of public opinion has voted against the proposed change of terms of Presidents of the United States from four to six years, with but one term to the President.

There are, of course, logical reasons for the majority of the people opposing this change. The people do not want to have to wait six years to express their opinion again on the national administration; those opposing the change fear they might want to make a change earlier than that.

But one six-year term for the President would greatly add to the dignity of that high office. It seems a little ridiculous to The Times for the holder of the highest office within the gift of the people to finish up a four-year term, win the nomination again from his party and then be obliged to go out on the stump, like any ordinary office-seeker, and wage political warfare.

A six-year term is sufficient time for development of a party program, and, being but one and

final term, would permit the President to retire with the dignity which should be the life-long heritage of our Chief Executives.

### A DRUNKEN CHILD

A boy, nothing more than a child,—he was perhaps eight or ten years old—was taken to the city jail here recently when he was found staggering about the streets, drunk.

The Times has no intention of revealing the child's name. Those at the "age of unaccountability" should be protected, insofar as is possible, from the stigma of notoriety.

The child himself is not disgraced. Odium that reeks to heaven does clothe any person responsible for child drunkenness. Such crime deserves prosecution without mercy. The mantle of shame, shrouds any social system that permits such degradation of innocent childhood.

What will be done about it?

## Kentucky Pictures Being Featured In Farmer Section Of The Floyd County Times

Readers of The Floyd County Times find pictures of 17 beautiful coeds in the Mountain Laurel Festival at Pineville; Miss Marjorie Fiober, of Nicholasville, Kentucky's sponsor in the famous Rhododendron Festival at Asheville, N. C.; the men's weaving contest at Berea College and many others.

Most Kentucky farmers these days are discussing the new soil conservation program, so our State Farmer Section for July presents a clear cut analysis of the program showing that it is being met with general approval throughout the state, with more than 100,000 farmers signed up. Figures shown in a graphic chart reveal the actual land conditions throughout the state.

## Big Gasser Comes In With Blaze; Damage Is \$5,000

This is the third Big Line well to be drilled on the Burkett farm. The Inland Gas Corporation owns all three. The latest gasser came in "natural," and has strong rock pressure. The two wells preceding Monday night's strike were drilled this year.

### NOTICE OF REWARD

Five dollars reward is offered for the return of a White Eskimo Spitz, female, right ear tan. Last seen in Prestonsburg.

J. F. HOLBROOK,  
Prestonsburg, Ky.

### CARD OF THANKS

We wish to take this means of expressing our heartfelt gratitude for all the kindnesses shown us and the services rendered by thoughtful friends upon the path of our beloved husband and father, T. J. Hagens.

THE FAMILY

### RESIDENCE DAMAGED

Home of Mr. and Mrs. Ballard Johnson here was slightly damaged by fire Sunday night.

Japanese rejection of the 1936 naval treaty is described as "a blow to hope of a universal agreement"; but that rope was intoxicated already.

Oil and gas leases for sale at The Times office.

### Third Union Church School to End With Exercises on Friday

Commencement of the third annual union vacation church school will be held at Prestonsburg high school at 7:00 o'clock Friday night. All friends of the students and of the school are invited.

The closing exercises will consist of an exhibition of handwork products made under the sundry crafts courses at 7:30; and a program at 8 o'clock. Cloth and paper products, native clay vessels and insect specimens are to be included in the exhibit.

Each department—beginners, primaries, junior, and intermediates—are being called upon to take part in the closing program. There will be also a game exhibition under the direction of Mrs. Claybourne Stephens; a demonstration of hymn singing; and a recital by Miss Anne Allen of what she had learned in the training class for Christian teachers. Certificates will be awarded near the conclusion of the program to students who have attended eight sessions of the school; those who have attended the full 10 days will receive also red ribbons and those who have done especially creditable work, blue ribbons.

Average attendance during the first week of the school was 111, but an attendance lapse was shown the first two days of this week.

FOR SALE—one \$35 Webster's new International Dictionary with reference history, in excellent condition. Price \$15. write or call

# In The WEEK'S NEWS

WORLD'S FAIR IN NEW YORK—Mayor LaGuardia, assisted by Miss Lilly Reed and Grover Whalen, president of fair committee, breaks ground for the 1939 World's Fair at New York City.

KNOT A RADISH—A radish with a pretzel complex was found in a field of the Ferry-Morse Seed Breeding Institute in Michigan. It was one of 3,000,000 radishes pulled and inspected, the 1,000,000 best being replanted for seed increases. This root met an obstruction in the ground and tied itself in a knot.

ANNOUNCES BUILDING EXPANSION—Harlow H. Curtice, President of Buick Motor Company, announces a \$1,500,000 building expansion program made necessary by increased volume of car sales this year and in anticipation of even greater sales in 1937.

LOVE FOUND A WAY—Mr. and Mrs. William Moegelin of Brooklyn, N. Y., who against the advice of their parents withdrew their life savings, \$150, and were married. They went west attended a movie and were awarded a \$25,000 home in a lucky number contest.

BARBARA (SNOONEY) BLAIR, well-known actress, sailed aboard the Queen Mary for London where she will be featured in one of the season's new plays. Miss Blair and her dog Snooney are prime favorites with America's radio fans.

MADE GOOD HER BOAST—Mrs. Eleanor Holm Jarrett, center, who made good her boast to beat the Kampa sisters, Elizabeth, left, and Erna, right, at the National A. A. U. championships. Mrs. Jarrett set a new world's record in the backstroke event.

Among those from Prestonsburg who spent the week-end in Cincinnati attending the Reds-Cardinals baseball game were Mr. and Mrs. Adrian Collins and son, Pete, Mr. and Mrs. A. L. Davidson, Mr. and Mrs. Willie Mellon, J. R. Hurt, Frank Friend, W. A. Spradlin, W. C. Rimmer, E. R. Burke, Circuit Clerk T. B. Sturgill, County Clerk A. B. Meade and County Attorney Forrest D. Short.

Mr. and Mrs. J. J. Hatcher spent the Fourth at National Bridge, Va., and in Kingsport and Johnson City, Tenn.

The Rev. Buell Kazee, of Morehead, occupied the pulpit of Irene Cole Memorial Baptist Church at the Sunday night service, and delivered a very interesting sermon.

Mrs. Anna May and daughters, Mrs. F. C. Hall and Mrs. R. G. Francis, spent Tuesday in Huntington, W. Va.

Mrs. Flora Sizemore and Luther Herald spent Sunday in Williamson, W. Va., guests of Mrs. J. C. Hager.

Mrs. Dewey Stumbo and children returned Monday to their home at Minnie after spending the week-end in Prestonsburg with her mother, Mrs. Fanny Collins.

Misses Helen and Dorothy Darnell, of Frankfort, Ky., were guests of friends here over the week-end.

Mrs. Noah Swindell and daughter, Gay and Miss Dorothy Taylor, of Wise, W. Va., were guests last week of Mr. and Mrs. O. H. Stumbo and son, O. H. Jr.

Tivis Stone, of Wayland, spent the week-end here.

E. A. Stumbo was in Winchester and Lexington Monday, in the latter place visiting his daughter, Miss Kathryn, who is attending the University of Kentucky.

Arthur Brisbane

Typical of a good, modest king, always obedient to duty. At the request of his ministers, including Sir John Simon, who waited upon him at the last moment, the king struggled pathetically to sign his name to a state paper, succeeded, then, turning to his advisers, spoke those last words, followed by a smile and nod with which he was accustomed to end an audience.

This was published in the Star of Johannesburg, South Africa, in a Reuter dispatch. Mr. Gunia sends the clipping from Gibsonia, Pa. Much obliged.

The Italian soldier Badoglio, in the striking uniform of an Italian marshal, returned to Rome and embraced Mussolini, who wore the uniform of a corporal of fascist militia. Napoleon also liked to be called the "little corporal."

Marshal Badoglio is an Italian soldier who obeys orders. When Mussolini's forces were marching on Rome, Badoglio, according to the story, said to the king: "What shall I do with them out?" The king ordered: "No; no violence." Now, Mussolini rules, and on his orders Badoglio wipes out Haile Selassie and the government of Ethiopia.

Anything could happen in Europe, and one of the things considered quite possible, extremely disturbing to respectable old England and others, is an agreement between Mussolini and Hitler to make "a deal on Austria" profitable for both; not for Austria.

There is always, however, the memory of 1914, when Austria, Italy and the Kaiser had the triple alliance that did not "stand up." Such alliances usually go along racial lines, if they are to last.

France and Italy are natural allies, both Latin; England and the United States would probably be found not far apart if a really big World war should ever come, with one or two other IFS.

Science proudly demonstrates for the Westinghouse company a new lamp that "rivals the beams of the sun." The demonstrator explained that the temperature at the sun's surface is about 11,732 degrees Fahrenheit, while the new lamp reaches 25,232 degrees Fahrenheit. That, however, as scientists know, is a long way from the sun's best temperature.

According to Sir James Jeans, there prevails in the depths of the sun temperature of "forty million degrees centigrade," which is considerably higher than any man-made temperature.

If you came within 1,000 miles of a 5 cent piece with a temperature of 40,000,000 degrees centigrade, you would be burned to a cinder; hard to believe, but true.

England protested against raising the elevation of guns on American warships because that would make our guns shoot too far. In case of war we might hit a British ship lined up against us.

Are animals capable of any thought?

A dog on Prince Edward island, whining and howling with its muzzle against a pile of clothing on the edge of a pool, attracted men who took from the water the bodies of two brothers, fifteen and seventeen years old. Could the dog have "thought out" a connection between the clothing and the disappearance of its young owners?

At Ur, ancient city of the Chaldeans, they show a gigantic brick temple, recently uncovered, where it has lain in the ground covered through the ages. It was constructed originally, like the tower of Babel, to enable the builders to get up into heaven and reach the gods. First they invented those pagan gods, and then they actually believed in them.

The United States navy has ordered 191 "bomber" airplanes; cheerful small news.

It is to be hoped that the government is trying to build bomber planes able to fly any ocean.

If war came, our bombing operations could be carried on in countries across the Atlantic or the Pacific. We should not want to do any bombing in America. After the first experiment, no country would send any ships within easy bombing or submarine range of these shores.

What Irvin S. Cobb Thinks about

SANTA MONICA, CALIF.—So soon as this, with both tickets just put up, folks already are saying this is starting out to be a bitter campaign—the bitterest, perhaps, since away back in 1896.

My guess is these prophets don't realize the twentieth part of it. I'm reminded of what happened when my old friend, Col. Bill Hayward, sailed with his negro regiment for France during the war.

Irvin S. Cobb

The outfit embarked at night. Next morning, when the transport was well out at sea a pop-eyed trooper from the interior South stood staring at the endless watery expanse. "Boy!" he exclaimed to a companion, "dis sho' is one big ocean!" "Mos' doubtless," stated the second soldier, "but, son, whut you's lookin' at now is only jes de top layer."

The Union Party AT CLEVELAND there was harmony and a quiet interment for the old Guard. At Philadelphia the proceedings moved along on greased rollers. But for real excitement, wait until that new Union party holds its convention.

Then will be the signal to remove the women and children to a place of safety. Just consider who'll be there:

The inflationists who think that, as long as we have government engraving plants and printing presses, money should be plentiful. The group committed to the idea that, if the farmer won't do something for himself, something should be done for the farmer. Doctor Townsend, with his project to provide old age pensions for everybody over sixty except Congressman McGoarty. Father Coughlin, calling for social justice and better radio hook-ups. Huey Long's successor, who'd share the wealth and make every man a king.

Al Smith's Strategy AS AN old-time headliner of political vaudeville, Al Smith should have known better than to pull that ancient wheeze—shooting at Philadelphia letter carriers on a Sunday afternoon.

And besides, think of the desperate chance he and his supporting quartet of sharpshooters took: come between a mother panther and her cubs; come between a Frenchman and his fracas; come between a radio announcer and his elocution, but never, right on the eve of their national convention, try to come between a flock of office-holding Democrats and the prospect of four more uninterrupted years of the same.

Trouble of Travelers OUTSIDE the larger cities, when a hotel manager wishes to show a special guest special attention, he assigns him to the bed-chamber of state which usually is on the second floor, invariably is at the front of the house and nearly always on the corner where electric signs twinkle merrily till daylight in the poor/sleepless wretch's eyes.

And along toward 2 a. m. a party named Dewey, standing in the street below, will start telling a party named Pink, about sumpin' mighty comical that's come up Sad'day night whereupon Pink will be moved to recall a few social reminiscences of his own.

Convention Invocations ALTHOUGH a southerner—however, not working at the trade as steadily as some—I have to snicker when a Democratic senator walks out on his own convention because a colored preacher asks the divine blessing on its deliberations. Which reminds me:

The first time that great Texan, Jim Hogg, ran for the governorship his party split. The bolters joined with the Republican outfit—mostly black—to put up a fusion ticket.

At this pinto convention, the Rev. "Sin Killer" Griffin, a famous black evangelist, delivered the invocation. In concluding, he threw an unexpected bombshell into the piebald ranks by earnestly urging the Lord to Put Hogg in the governor's chair.

Terrific uproar ensued. Finally a dusky stalwart got the floor. "I moves," he bellowed, "dat dis yere traitorsome and on-Republican prayer be expunged from de record."

Majestically, "Sin Killer" erected himself. "I rises," he stated, "to a pint of order. It's too late to expunge frum de record a prayer which already done got to heaven more'n five minutes ago."

A Charming Sports Frock

No. 1857-B

Trim modish raglan shoulders, no sleeves to set in, make this attractive dress easily fashioned by even an amateur sewer. And the neckline is extremely flattering for office wear or busy shoppers, it answers perfectly, too, for general daytime functions.

You'll appreciate the two roomy pockets, and the back yoke will enable you to "bear your burdens" lightly. Try making it in tub silk, shantung, printed crepe or linen. Whichever fabric you choose gives a silhouette that is universally flattering and a touch of sophistication. Barbara Bell Pattern No.

1857-B is available in sizes: 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 32, 34, 36, 38, 40 and 42. Size 16 (34) requires 3 7-8 yards of 39 inch material plus 1 1/4 yard for the belt. Send 15 cents in coins for the pattern.

The Summer Pattern Book containing 100 Barbara Bell well-planned, easy-to-make patterns is ready. Send 15 cents in coins for your copy.

**Eight Girls—All Lovely!**

Comedian Ed Wynn calls these young ladies his "Eight Lovely Girls." Their singing is a regular feature of Wynn's weekly radio appearance with Graham McNamee. "They're lovely to look at... and lovely to hear," says the comedian. He and his pretty singers are heard over the NBC network at 9:30 E.D.S.T. every Tuesday night.

**AUTOMOBILE CLUB SEEKS BEST DRIVER**

What automobile driver in the state of Kentucky has the most outstanding record for care in traffic and freedom from accidents and law observance?  
The Louisville Automobile Club and Blue Grass Automobile Clubs would like to know and have called for the help of the motoring public in gathering data which will make a selection possible.  
When the state's most outstanding

safety record holder is chosen, he will be invited to join the First National Safe Driver Motorcade to New York in the latter part of August. Each state will provide one delegate, who will take part in conferences in New York on the subject of more care in traffic. Eugene Stuart, secretary-manager of the Louisville Automobile Club, pointed out that the expenses of each delegate will be paid on a mileage basis and hotel accommodations will be provided in New York for three days at the Waldorf-Astoria by the OIT Safety Foundation which is sponsoring the motorcade with the active participation of A. A. A. motor clubs.

**More MEN and WOMEN to SERVE You**

TWELVE HUNDRED additional people were put to work by the Southern Bell Telephone Company in 1935, to care for the increased public demand for service and the resultant growth of the business.

This was an increase of 8.12 per cent, and brought the total number of men and women who provide you with good telephone service in the South to 17,000.

Their payroll was nineteen and one-third million dollars, most of which was spent in their home communities.

Through 936 central offices in nine states, they devote their thought and effort to give you the best possible telephone service that skill and training can provide.

They planned and placed in service \$12,428,906 worth of additional telephone "plant" in 1935 to meet service demands, and this year it will expand even more.

Taxes, in 1935, required a record sum of \$6,505,000 from the telephone company by federal, state, county and municipal agencies. This figure, too, will be exceeded in 1936.

Guiding these telephone folks at all times, in fair weather or in emergencies such as fire, floods or storms, is their expressed objective: to give the public the best possible service at the lowest cost consistent with the financial safety of the business.

**Take Your Car on the Boat**

**NEW LOWER FARES**

on the great S.S. S... 7 DAYS—ALL EXPENSE... 49.50

"I understand that Chevrolet is now enjoying the biggest demand in its history."  
"You're right. And there's a good reason. Everybody knows that this new Chevrolet is the first motor car with all modern advantages to sell at such a low price—it's *The only complete low-priced car!*"

**CHEVROLET**

FOR ECONOMICAL TRANSPORTATION

**Carter Motor Sales**  
Prestonsburg, Ky.

**NEW PERFECTED HYDRAULIC BRAKES**

You and your family want safe brakes on your new motor car—brakes that will give you maximum stopping power—brakes that will be always equalized, always dependable—and that means New Perfected Hydraulic Brakes. Chevrolet is the only low-priced car that has them.

**SOLID STEEL one-piece TURRET TOP**

You want a safe roof over your head, too—a Solid Steel one-piece Turret Top. It gives complete overhead protection... is smarter looking... helps to keep passengers cooler in summer and warmer in winter... eliminates necessity for top repairs or re-dressing. Only Chevrolet offers it at low prices.

**IMPROVED GLIDING KNEE-ACTION RIDE\***

You also want the greater comfort and greater road stability of Chevrolet's Improved Gliding Knee-Action Ride\*. Millions of Knee-Action users will tell you that this is the world's safest, smoothest ride. And, of course, it's exclusive to Chevrolet in the low-price range.

**GENUINE FISHER NO DRAFT VENTILATION**

You'll get a lot of comfort out of this feature, too. It gives each passenger individually controlled ventilation... "scoops in" refreshing breezes on hot days... eliminates drafts in cold weather... prevents clouding of the windshield. It's available only in this one low-priced car.

**HIGH-COMPRESSION VALVE-IN-HEAD ENGINE**

And for all-round performance with economy, there is nothing like Chevrolet's High-Compression Valve-in-Head Engine. It's the same type of engine that is used in record-holding airplanes, power boats and racing cars; it will save you money mile after mile; and it, too, is exclusive to Chevrolet in the low-price range.

**SHOCKPROOF STEERING\***

Also an outstanding advantage—also exclusive to this one low-priced car—is Shockproof Steering\*. It eliminates steering wheel vibration—makes driving easier and safer than ever before. Visit your nearest Chevrolet dealer today and have a thorough demonstration of this only complete low-priced car.

**ALL THESE FEATURES AT CHEVROLET'S LOW PRICES**

**\$495** AND UP. List price of New Standard Coupe at Flint, Mich. With bumpers, spare tire and tire lock, the list price is \$20 additional. \*Knee-Action on Master Models only, \$20 additional. Prices quoted in this advertisement are list at Flint, Michigan, and subject to change without notice. A General Motors Value General Motors Installment Plan—monthly payments to suit your purse.

CHEVROLET MOTOR COMPANY DETROIT, MICH.

Application blanks are now available upon request of these two automobile clubs and indicate what qualifications are necessary. The applicant is asked to tell:

- Number of years a driver.
- Total mileage driven.
- Mileage driven in last 10 years.
- Date and nature of last accident, if any.
- Traffic law violations, if any.

From these questions it was made clear that the final selections will rest between the drivers who have covered the most mileage in the last 10 years without any accident. In case of similarity of record, other considerations will figure in the final equation. A committee of judges for the state as a whole will be appointed and announced close on July 15.

**SNAKE FOUND IN TUB AFTER GIRL'S BATH**

Fifteen minutes after Peggy Jean, five-year-old daughter of Herman Wheeler, of Paintsville, had taken a bath Friday evening, last week, an 18-inch snake was found in the bathtub, alive and wiggling. How the reptile got into the tub remains something of a mystery. It was said to be a copperhead.

**PLEA FOR SAFE DRIVING IS MADE**

Frankfort, Ky., June 30.—A plea for safer driving by motorists on Kentucky's highways during the

summer months and early fall is now being made throughout the state by E. O. Huey, superintendent, Department of Safety, who in his official capacity is also head of the state highway patrol and police department.

The larger number of tourists that will be in the state during the next few months and their lack of knowledge of established regulations as well as of the roads themselves is given as one of the principal reasons by Mr. Huey for his plea for co-operation for safer driving on the state highways.

"The presence of a large number of tourists and out-of-state visitors in Kentucky during the summer months constitute an additional hazard to motoring," Superintendent Huey declared, "and it is the sincere desire of the Department of Safety that all Kentucky motorists will aid in the attempt to keep automobile accidents to a minimum this summer."

Members of the state police and the highway patrol have been instructed to be particularly diligent in their efforts to maintain a high standard of safety on the highways," said Mr. Huey, "but their efforts will be severely handicapped without the co-operation of the general public."

"I am asking all civic clubs, automobile organizations and local police officers to join the state officers in making travel over our state highways safer. All motorists are urged to exercise more than ordinary caution in their driving the next few months, have a regard for all traffic

rules and display a consideration for the rights of the 'other fellow' on the road."

State police have been issued special instructions to urge safety precautions for motorists. A particular effort is being made to obtain the fullest co-operation of local authorities in all cities, towns and counties.

**OFFICER'S CAR STOLEN**

Ranso Marcum, officer at Glo, was in Prestonsburg Friday seeking to effect the recovery of his auto, a 1931 Oldsmobile, which was stolen on the preceding night. Police in Pikeville, Williamson and downriver towns had been requested to watch for the car. The auto bore Kentucky license 236-730 and was a four-door black sedan.

**RAIDERS CAPTURE STILL**

Deputy Sheriff Ike Fitzpatrick, assisted by Jake and Norman Holbrook, Thursday last week, captured a moonshining still on the Ray branch of Middle Creek. Thirty-two gallons of mash, approximately the full capacity of the outfit, were destroyed. The still-operator is still missing.

**Personal to The Colonel—Does This Pay the Interest?**

Colonel Irvin Arrowood and a party of friends on a fishing trip near Webster Springs, W. Va., last week instead of catching fish were almost caught by a bear. No snakes were discovered, for the Colonel had not yet opened his special brand.

**The Curious Corner**

The body of Franklin P. Salyer, of Knott county, Ky., has been buried three times.

Salyer was shot and killed at his home on Beaver Creek in the 1880's. He was buried there.

His father, Samuel Salyer, Jr., of Wise county, Va., went to Knott county, had the body removed from his newly made grave and hauled on a wagon all the miles across the mountains to his home at Princess Flats and reburied near his home.

Then when the railroads built into Princess Flats and the place was renamed Norton, and a town laid off, the graveyard was in the way of progress and all the bodies there, including Franklin P. Salyer, were taken up and removed to the south slope of Backbone Ridge and reburied, starting the now large burying ground called Highland cemetery.

**BIRTH OF DAUGHTER**

Born to Mr. and Mrs. Fred De-rcysett a fine daughter Saturday, June 27. This is the second child in the family. The little miss was christened Nella Joe.

Diesel Engine opportunities are here. The L. C. S. Gousser prepared by leading authorities will make you a trained man. International Correspondence Schools, Box 889, Scranton, Pa.

## Right Out Of The Air

By R F SERVICE

Versatile Jimmy Dorsey has skyrocketed to front rank among the band leaders since he has been featured on the Thursday night Music Hall programs with Bing Crosby.

The job is one that requires a capable, even brilliant musician, extraordinary skill at directing accompaniments, unique and original arrangements and expert showmanship. For instance, he has played accompaniments in the last few weeks for such completely different types of artists as Virginia Bruce, of the scrappy "Chalapi," the great Russian basso, Rose Hampton, of the Metropolitan Opera; Joan Blondell, Una Merkel and a score of others.

\*\*\* Most distinguished audience that sees any radio program regularly is one which sits across the footlights from the Radio Theatre performance every Monday night in Hollywood. Leaving no stone unturned to catch the spirit and atmosphere of the movie capital and get it across the airways to the listening audience, Cecil B. DeMille, producer of Radio Theatre, installed the show in a real theatre on Hollywood Boulevard.

\*\*\* Newest gag on Radio Row is Frank Fay's split personality. Script-cutting every Friday before the broadcast brings out the Faysian equivalent of Dr. Jekyll and Mr. Hyde without the sinister aspect. It's a knockdown-dragout fight between Fay, the comedian, and Fay, the singer, with Fay, the writer, as referee. Neither the comedian nor the singer ever wants to give up a chorus or a line but Fay, the writer, bears down and makes the two get together.

\*\*\* The man who works while Hollywood sleeps is Victor Young, band leader of the Saturday night Chateau varieties. Vic is doing some picture scores as well as the arrangements for the broadcast. The latter itself is a full-time job and so most of Vic's original composition is done in the wee sma' hours. A party of celebrating scene stars on their way home stopped at his house recently, rather early in the morning, saw that the plucky little maestro was looking tired and quickly took him out of the house. They drove down to Malibu Beach and back, and warned Vic to go

right to bed. Having worked three successive nights to deliver a score on time to a radio studio, Victor went right on working until dawn anyhow.

\*\*\* Probably the most serious singer on the air today is Phil Ducey, star of that Russian biggy show on NBC. Yet, during rehearsals he presents a portrait of complete joviality and his easy manner does much to relieve the pre-broadcast tension which marks most broadcasts. His manner and personality help explain the success he has enjoyed on the air for the past ten years, which is considered a century along Radio Row.

\*\*\* When Pearl Pickens steps up to the microphone to sing of the West with Carson Robison's "Buckaroo," she has no difficulty catching the atmosphere of the song. Not even the conservative setting of a studio fazes her, for Pearl is a native of Lebo, Kansas, and has spent most of her life on the plains. A radio program is just another community sing to this prairie flower.

\*\*\* Tim Ryan and Irene Noble who are filling in for Jack Benny on his Sunday night NBC spot while the suave jester vacations in Hollywood, are doing something new in the comedy line. Like Benny, Fred Allen and Phil Baker they are adherents of situation humor, but instead of introducing a new set of locales and characterizations on each broadcast, their entire series is based on a continuous plot.

\*\*\* A noted auto manufacturer has announced that when Major Edward Bowes gives his broadcasts in September as radio representative of the motor maker's products as a group, the Major's well known amateur hour will be heard over Columbia. Thursday evenings from 9 to 10 o'clock, E. S. T. In order to avoid any possibility of conflict with the interests of Major Bowes' former sponsors, it was the belief of the management of the motor company that the change in the Major's sponsorship should also be accompanied by a change of time, thus leaving the way clear for the previous sponsors to continue on the air at their accustomed time without interruption.

Virginia Bruce

Phil Ducey

Tim Ryan

ANDREW CALHOUN

### SEVENTH DISTRICT MEET

Continued from page one  
ident of the Pikeville Woman's Club, to serve as general chairman of the committee in charge of arrangements, and Mrs. Langley requests each club president in the district to serve with her. This committee with Mrs. W. P. Mayo, first state vice-president, and Mrs. May, will meet in Pikeville in the fall for the completion of plans.

### HUNTER OUSTER

Continued from page one  
Mr. Hunter said that, in every instance, his nominations followed the recommendations of sub-district trustees for rural school selections. Meanwhile, litigation continues unabated in county school administration matters. The judgement of Judge Alcorn canceling the certificates of election of Guy Childers and Harold Bailey as members of the board of education was entered Monday. Saturday, counsel for the board of education entered a motion before the Chief Justice of the Court of Appeals asking for an immediate mandate canceling the injunction issued in favor of Mr. Hunter to prevent his ouster from office, thus seeking his immediate removal. Hunter countered with a motion asking a continuance of the injunction until the Court of Appeals may act on his petition for rehearing on the case, in which the court recently decided against him. Leonard Martin, of Branches, Creek, is the new attendance officer, succeeding John Warix, who resigned. Mr. Martin is a graduate of Berea College.

### MOLES SELECTED TO ORGANIZE SONS OF LEGION IN P'BURG

At a recent meeting of Floyd Post No. 129, American Legion, Lon S. Moles, who in 1919 organized and served the local Post as its first commander, was assigned to organize and sponsor a squadron of the Sons of the American Legion which now has a membership of 42,000 in the United States. All sons of members and sons of deceased veterans of the World War are eligible.

Only a few more youngsters are needed to complete the requirements for a squadron and it is anticipated these will be in within a few days. Application will then be made for a squadron charter, the boys outfitted, leaders selected and the squadron started on its activities. The dues are nominal and cover cost of cap, arm band and insignia.

Assembly place for the youngsters will be at Abbott Heights Country Club where they will engage in games and sports, as well as the more serious side of S. A. L. education. Later, it is the thought and hope of local Legionnaires that it will be possible to provide full uniforms for the boys, and outfit a drum and bugle corps.

### SOYBEANS, COWPEAS MAY BE GROWN FOR HAY IN NEW PROGRAM

Floyd county soil conservation committee, in a meeting here Thursday, last week, recommended sowing of soybeans and cowpeas as emergency hay crops, with rye or winter oats to be used as cover crops. The recommendation was voted at the suggestion of County Agent S. L. Isbell.

Growing of soybeans and cowpeas as emergency hay crops in Kentucky is permissible under the Agricultural Conservation Program, provided they are followed with cover crops, according to an announcement from the College of Agriculture at Lexington.

This fact is said to be of particular interest at this time, since the drought has focused attention to the need of these crops to offset the scarcity of hay to the state. Thousands of farmers may still sow soybeans, cowpeas, sudan grass, millet and other hay and pasture crops.

Soybeans and cowpeas, pastured, graded or hogged-off, either when green or mature, are classified as soil conserving crops in the Agricultural Conservation Program. They also may be harvested for hay, and still be classified as soil-conserving, provided a winter cover crop is planted on the acreage prior to October 31.

Other changes contemplated in the program, as a result of the drought, include permission to plant additional acreage of sudan grass, sweet sorghum and millet without affecting soil-conservation payments.

# Unique Theater .. Program

Offering For Week Of July 10--16

Unique Theater  
Prestonsburg, Kentucky

NIGHT SHOWS START AT 7:30 P. M.

Irish potatoes harvested with a production of 42,005 bushels. Sweet potatoes totaled 521 bushels with 22,275 bushels.

There were 9,985 cattle on January 1, 1935, an increase of 59 percent over April 1, 1930. Cows and heifers two years old and over increased from 3,701 to 5,907, or 62 per cent. Eggs increased 15 per cent. There was a reduction of 48 percent in sheep. There were 1,208 horses reported on January 1, 1935, and 2,045 mules.

These figures for selected items are preliminary and subject to correction. Final figures for the 1935

Farm Census are to be presented by counties in a state bulletin for Kentucky.

### NOTICE

To Whom It May Concern:

July 3, 1936  
You are hereby notified to move all steel, etc., from Winchester mine and give up possession within 30 days from above date.

D. E. LESLIE  
Emma, Ky.

J. D. Bond spent Monday in Huntington and Ironton.

## ANNOUNCEMENT

Mr. Fife, our manager, was in Cincinnati this week and made some wonderful buys in merchandise for the entire family. We have arriving daily new sandals, shoes, dresses, trousers, shirts, piece goods-- in fact almost everything for anybody or anything for everybody.

## ANDERSON DEPT. STORE

First St.

# Soil Program Meets General Approval

By A STAFF WRITER

TENNESSEE and Kentucky farmers are cooperating whole-heartedly with the new soil conservation program. In fact, a greater number are apparently participating in this program than did in the various activities under the AAA.

Total figures released the first of July show more than 100,000 farmers in Kentucky signed up under the soil program, and in Tennessee more than 85,000.

At least, that is the number that have completed work sheets, qualifying farm operators for earning payments. It is presumed by the administrators of the program that the same number of applications for participation in benefits will be made. The worksheet deadline previously set for the end of May was advanced to June 15.

Community meetings were held in every county in both states. Soon now, a second series of meetings will be under way to acquaint the farm operators with the correct method of making out benefit applications.

Comparison of the whole AAA total of contracts does not give an accurate estimate of the definite number of farmers participating, since the AAA contracts were signed on various commodities rather than by farms. Census reports show around 270,000 farmers in Tennessee, but there are only approximately 100,000 farming tracts under the soil conservation program classification. It appears a more general type of farm operator is being taken in under the benefits of the new program.

### 75 Per Cent Take Part

J. B. Hutson, administrator of the East Central Region which includes Tennessee, Kentucky, North Carolina, West Virginia, Virginia, and Maryland, states that better than 75 per cent of farm operators are taking part in the new program. He believes truck gardeners and livestock farmers are better satisfied with the new program than they were with the AAA, but figures from cotton and tobacco producing counties appear to indicate that the percentage of farmers participating was as great as under the commodity plan, while in counties in which corn is the main crop the numbers cooperating exceed the AAA total.

In Kentucky, it was found that in many counties 85 to 90 per cent of the crop land could be included in the conservation program. For the state as a whole, it was estimated between 75 and 80 per cent of the total land should come under the program.

The Department of Agriculture survey shows 95 per cent of the land in Kentucky had been damaged by erosion. This means that more than 24,000,000 acres have lost some of their productive capacity. It was estimated that 87 per cent of Kentucky's farming land was affected by gulleying and that 2,697,495 acres had been destroyed so far as further conservation was concerned. Sheet erosion, it was estimated, has affected an area of nearly 19,000 acres.

### Drought Hits Hard

East Tennessee in particular, and the state as a whole, suffered from the Spring drought which hit Georgia, the Carolinas and Kentucky, the latter to a lesser extent. Cotton and corn escaped serious damage, but pasture crops, grains

such as barley and oats, and truck crops, especially strawberries and Irish potatoes, were greatly reduced in quantity and quality. Tobacco growers began to feel the effects of the drought early in May and by June 1 it was realized that the cut in the year's crop was going to be greatly under the five-year average.

All this, while it delayed the making out of work sheets, contributed to success of the farm program. Since the work sheets are based on the 1935 farm record, rather than the 1936 farm plan, a drought, or extremely wet season would not affect soil conserving or soil building payments, thus constituting a form of insurance.

The report of the government survey in Kentucky is summarized as follows: "Three distinct erosion conditions exist in the Appalachian Highlands in the eastern part of Kentucky. Severe sheet erosion was found on a large percentage of the corn and tobacco land in the northeastern part.

### Demonstrate Erosion Control

"In the central part, erosion has been less severe because a smaller proportion of land has been cleared and utilized for clean-tilled crops.

"The southern part of the Highland area was subject to occasional gulleying with little or no sheet erosion.

"The inner Bluegrass region in the north-central part, west of the Appalachian Highlands, was found to have a moderate to serious sheet erosion.

"Because of the topography, erosion is very severe in the Highland Rim area.

The beginning of gulleying, a familiar sight in the sloping hill country of the Tennessee Valley.

"The steep lands of low soil fertility in the western coal fields area have suffered from both severe gulleying and severe sheet erosion.

The Soil Conservation Service, with headquarters at Zanesville, Ohio, has set up an erosion-control demonstration at Paducah, Ky., known as the Massac Creek project. It has a cooperative agreement on farms covering 4,500 acres of the 25,000 acres in the watershed of this creek.

Practices recommended by the Kentucky College of Agriculture are being used to stop the washing of the soil. The utilization of Winter cover crops and strip-cropping also are included in the erosion prevention demonstration at Paducah. More legumes will be recommended in the development of better cropping system. Ground limestone will be used to make possible the growing of sweet clover and alfalfa.

Retirement of unsuitable land from grazing and cultivation is another goal. Planting trees on a large portion of the area will serve to re-build eroded areas. More than 2,600,000 trees have been set at the Massac Creek project.

Increase in wildlife in the area will result from the erosion control practices. The present state of wildlife has suffered from the burning over of forests and pastures and from lack of proper vegetation. Planting and other management measures designed to reduce

erosion and develop valuable wildlife feed and cover are part of the program.

### Erosion Control in Coal Fields

At Madisonville, Hopkins County, in the heart of the western coal fields, 20 farms totaling approximately 2,500 acres are under cooperative agreement in the Soil Conservation Service project for demonstrating erosion-control.

The work area consists of about 29,000 acres immediately north of Madisonville, and includes 400 farms on the watersheds of Greasy and Pond creeks which drain into Tradewater river. The area extends about 6 miles from Madisonville along U. S. Highway 41 and about 2 miles east and west of this road.

Practical methods of erosion prevention and control for the outer Bluegrass region are being demonstrated on a 28,000-acre watershed project in northern Grant and Pendleton counties. All farms in the drainage basin of the Middle Fork and Grassy creek are included in the project area. Frequent gullies and rocky fields bear mute testimony to the severity of erosion damage.

The first step of the Soil Conservation Service coordinated erosion-control program is a complete inventory or stock-taking of the soil and erosion conditions on the farms under consideration. Information about the farm obtained from this detailed erosion survey is used in drawing up a complete plan for the farm in close cooperation with the farmer.

### Pastures Improved

The resultant cropping plan, which lists the use of every field for a period of five years, is an important part of the cooperative agreement between the farmer and the Soil Conservation Service. Field crews may then start to work to effect the erosion-control program for the farm.

A typical plan for a farm in the project area calls for farming the ridge tops, keeping as much of the hillsides as possible in permanent sods, and reforesting the badly eroded spots which commonly occur at the breaks of the ridges. All intertilled crops are grown in contoured rows. Pasture improvement is done on present pasture fields where the sod is thin or broken.

The cases where there is not enough ridge land to care for the farmer's needs, the less steep hillsides are cropped in strips. Corn and tobacco strips are alternated with meadow strips, thus protecting the hillside against uncontrolled erosion. This type of farming has been found to give effective control over both gully and sheet erosion in other areas of smaller slopes.

Since the soils of ridge tops are commonly acid and comparatively low in productivity, field limrock is being crushed to correct this condition.

This soil improvement program encourages the growing of legumes, which in turn raises the productivity of these ridges and allows a more complete retirement of the slopes to sod crops.

## Land Condition In Kentucky

Table Prepared by H. H. Bennett, Chief S. C. C.

	Acres	Percent
Total area, exclusive of cities and water.....	25,701,698	100
With little or no erosion .....	1,363,860	5.3
Affected by sheet erosion .....	18,939,790	73.7
1/4 to 3/4 of top-soil lost .....	7,230,599	28.1
Over 3/4 of top-soil and some sub-soil lost.....	11,709,191	45.6
Total area affected by gulleying .....	22,369,771	87.0
Occasional gullies .....	19,635,275	76.4
Severe gulleying .....	2,718,952	10.6
Destroyed by gullies .....	15,544	.....
Essentially destroyed for further tillage.....	2,679,495	10.4

# Farmers Make Crop of Game

Pointing quail in a brushy fence corner. Leave fence rows and clumps of rocky ground uncleared for game cover.

BY DICK WOOD

**S**PORTSMEN are waking up to the fact the supply of game is not going to last indefinitely by letting Nature take its course. Regulating game bags, by state and federal laws is not enough to insure a plentiful supply for increasing hordes of nimrods.

Game farming has long been a custom in Europe. Any land owner, or city sportsman fortified with a shotgun and hunting license costing \$2 or less can hunt in this country, but in Europe, the average sportsman is comparatively rich. There most hunting is done on public or private shooting preserves at a considerable fee.

Game shooting cannot long continue in this country for a dollar or two expenditure for license; half of that sum is spent on game law enforcement. It has long been done because the farmer has produced game birds and animals and willingly granted hunting rights to city sportsmen.

#### Hunting Necessary

In some sections, small game of various sorts thrive under natural conditions, and need periodical hunting to maintain a proper balance. An overabundance of squirrels or raccoon will damage corn considerably. Doves, pheasants and wildfowl will make heavy inroads on grain in the shock. So hunting is often welcomed by farmers who lack time to keep game in check.

Farmers who have considerable areas of waste land may profitably convert it into game refuges. Ring-neck pheasants, quail and ducks are easily raised for

stocking purposes. Some states are experimenting with the guinea.

Ducks, when released, will leave with the migratory flights, but other feathered game will remain on the farm, if cover, roosting and feeding conditions are satisfactory.

Quail should be raised to maturity with a bantam hen, then be released in good cover, adjacent to feed and water. Commercially, quail are most economically raised by the incubator-brooder system.

#### Sportsmen May Aid

Pheasants may be released at 10 to 12 weeks of age. Pheasants range similar to, but less extensively, than turkeys. Swamp land is best. Feed should be planted in advance, if necessary, allowing an acre to each bird. Guineas will range in more upland, brushy waste land and will stand slightly more crowding than pheasants.

Ducks and Canadian geese often will remain or return to waters where they are raised, thus affording the raiser some shooting. Ducks are almost invariably released for flights and the good of sportsmen in general.

Whether the farmer is interested in bettering his own shooting opportunities or has in mind commercializing shooting rights, he will find it profitable and inexpensive to encourage game propagation on waste lands. A club may be formed of sportsmen who should gladly pay for eggs or breeding stock, brooders planting feed, etc., for shooting privileges.

## FRANK FARMER

Says ---By A. B. Bryan

Farmers who are not up on scientific farming practices are usually down on them.

\* \* \*

A timely summer tip from Solomon: "He that tilleth his land shall have plenty of bread."—Proverbs 28:10.

\* \* \*

It's a crime against good health when parents fail to teach children to eat vegetables freely.

\* \* \*

*Wanted:* By every dairy cow in the South, a balanced ration, chiefly home-grown.

\* \* \*

In a growing crop, protection is an important element of production and therefore a big factor in profits.

\* \* \*

It takes moisture and fertility to grow weeds, and then what have you?

\* \* \*

A farmer who does not keep records for future benefit can not hope to become a record farmer.

Once our community found we could do things together it became a better community and we became better citizens.

\* \* \*

"Better a dinner of herbs and contentment," says wise old Solomon. Yea, and herbs from a good garden help to make contentment.

\* \* \*

I have fed hogs all my life, but I have learned more about balanced rations this year from watching my pig club boy than I had learned in all my life before.

\* \* \*

The little-respected by-products of yesterday's haphazard farming are the little, respected by-products of today's more scientific farming—and not so "little."

\* \* \*

Nearly every farmer has enough low moist land which if put into pasture grasses would produce fine grazing for several cows.

## JEST A-WHITTLIN' AN' A-THINKIN' BY PETE GETTYS

learnt to expect sech things—an' it's sorter like homefolks to us. But good-bye old boilin' cabbage—in a year or two you'll be gone, for market gardeners will be offerin' us smell-less cabbage.

An' down in Florida they're tryin' to grow an odorless an' "tearless" onion—an' that won't be any fun, an' I bet they won't taste near so good neither. Coffee don't taste as good now as it used to when Maw roasted it at home Saturdays on a wood stove, an' it smelled so good, an' every morning you could hear her grindin' it in the little wooden coffee mill on her lap. Fact is, you can jest keep on improvin' things, as they call it, till all the best part is gone—an' I still want my onions strong.

—o—

Ever have a pig for a pet? What a wonderful pal a pig is—the very flower of discretion. Your intimate confidences are safe with him. An' how attentive he is! He stands with ears straight up, his little eyes lookin' right into yours and his nostrils twitchin' with interest an' anticipation. Ever notice that a pig, more'n any other animal looks like many people you know? The moment you see a new pig you have a dozen names in your mind—an' every one of 'em fit perfectly.

When you learn to know a pig, your admiration grows for him. He never poses like somethin' he ain't. He lives purty much to a pattern with nary a worry, jest plain contented. He has none of that nervous twitchiness that's so wearin' to live with. He has no ideas about anything or himself. He never gets moody, uppity or frivolous.

So, when you reach that time in life when you commence sufferin' from the chronic orneriness of a man over 50, get yourself a pet pig.

## BETWEEN THE ROWS

Aesop's story of the satyr and the woodman is retold with a moral in a recent publication of the Rural Electrification Administration.

No doubt you recall how the satyr, upon meeting a woodman returning home one cold evening, asked the man why he blew upon his hands, and in reply was told it was to make them warm.

Upon reaching the woodman's cottage, the two sat down to hot porridge, and again the satyr questioned the man as to why he blew on his soup, and was told that thereby it was cooled.

Whereupon the satyr declared that one who could blow both hot and cold with the same breath must be bewitched and he left that place forever.

"And," moralizes the publication interested in more electrified farms, "despite his very active imagination, Aesop himself would believe the modern farmer bewitched who can by the snap of an electric switch, make heat or cold, power or light."

A negro minister was describing the "bad place" to a congregation of awed listeners in Tennessee.

"Friends," he said, "you all have seen melted iron runnin' out of a furnace, has you? It an white hot, sizzlin' and hissin.' Well, dey use dat stuff for ice cream in de place I se telling you about."

This reminds the writer of what I heard an Irish preacher in Virginia say about the evils of whiskey when prohibition was being discussed on every corner:

"Drink," he said "is the greatest curse of the country. It makes yer quar-

rel with yer neighbors. It makes yer shoot at yer landlord and it makes yer miss him."

Mark Twain, the famous humorist, once served as editor of a Southern farm paper while the regular editor took a vacation.

Toward sundown on the day after the paper went to press an old gentleman with a fine, but austere, face entered the office and asked:

"Are you the new editor?"

Mark answered in the affirmative.

"Have you ever edited an agricultural paper before?"

"No," the man who was later to become famous as a humorist answered. "This is my first attempt."

"Some instinct told me so," said the old gentleman. "I wish to read you what must have made me have that instinct. It was this editorial: 'Turnips should never be pulled, it injures them. It is much better to send a boy up and let him shake the tree.' Now what do you think of that?"

"Think of it?" replied Twain. "Why I think it's good. I have no doubt but that every year millions of bushels of turnips are spoiled in this township alone by being pulled in a half-ripe condition when, if they had sent a boy up to shake the tree . . ."

"Shake your grandmother! Turnips don't grow on trees!"

"Oh, they don't, don't they? Well, who said they did. The language was intended to be figurative—wholly figurative. Anybody that knows anything will know that I mean that the boy should shake the vine."

# ABC's of Tobacco Culture

BY ROY H. MILTON

Tobacco Specialist, University of Tennessee

I have prepared a sort of "ABC" of tobacco production, which the producer should bear in mind, from season to season, as the most practicable to obtain the maximum of benefit, through good and lean years.

First, select fertile land. Sod land is preferable. Next, land which can yield corn at the rate of 60 bushels to the acre, rich in nitrogen, phosphorus, lime and humus.

Provision of early plants should come next. Select an open spot in woods or a field, well supplied with organic matter. This land should be well sterilized and fertilized liberally, at the rate of one-half to one pound of fertilizer to the square yard. One tablespoonful of good graded seed should be planted to each 30 square yards. Sowing should be done in normal seasons on or before March 12.

Land to be planted to tobacco should be turned in Fall, Winter or early Spring. Besides disking, dragging should be done before laying off the rows.

**Fertilizer Necessary**

Outside the Central Basin of Middle Tennessee, land should be fertilized liberally.

Transplanting must be done with care. Hills should be uniform. When plants are set, press firmly into the ground, at least a foot apart.

Start cultivation as soon as land gets sufficiently dry after setting. Insect and cutworm control should be practiced early.

At the ripening period, top plants should range from 16 to 22 leaves high. Pull suckers at week intervals. Place from five to six large plants, at cutting time, on each four foot stick. Tobacco leaves burn easily when cut in August and September. Plants should be allowed to wilt when possible before scaffolding. In hauling to the barn, wait until dew evaporates. Poorly wilted leaves break easily.

A good, correctly built barn is needed.

Space sticks wide apart on tier poles, with a foot as the recommended distance. Tobacco yellowed on scaffold may be closer on tier poles. Ventilators should be opened by day and closed by night during the yellowing period. In very dry weather sprinkling the floor is helpful. In the case of excessive moisture, particular attention must be paid to ventilation. Artificial heat may be necessary.

**The ABC's**

For processing from bulking on:

*Let leaves cure and dry completely before bulking:* Green stems will rot when tied into hands; wet (green) stalks bulked down may get hot and rot leaves in contact.

*Bulk unstripped tobacco in a two-layer bulk:* Tobacco is bulked down off of stick of hold right order; two-layer bulk is desirable. (The leaves inside and butts of stalks outside); compressed air sprinkler may be used to order the butts of the stalks. Sprinkling the heavy leaf is dangerous.

*Sort the tobacco on a stripping table:* Convenience must not be overlooked in sorting (matching color, texture and body); better light can be had on a table than on the ground; standing is not so tiresome as sitting in one place; the table may also be used as a stick rack on which tied hands are placed.

**Matching Essential**

*Northern light needed:* A good light without cross-shadows is needed; sun dries tobacco and interferes with matching colors when it shines on tobacco; light from the north is regular and con-

stant; well lighted stripping room is the most desirable place for stripping or sorting. Every grower needs one.

*Match color, body, texture and length of leaves:* Tobacco has many grades; each grade carries a different price; there are wide ranges in prices; color, body, texture, and length should be matched in the hand; each grade should be tied into a separate hand.

*Tie neat, attractive hands:* Break off the leaves, lay each grade down on a separate area, pick them up and tie them; make hands nearly as large as a silver dollar; push stems down evenly; wrap securely with a leaf of the same color; make the top edge of the folded wrapper or binder leaf even with ends of the stems of the leaves. Tie securely with a tie-leaf folded to a width of 1 1/2 inch.

**Deliver in Good Order**

*Place each grade on separate stick:*

Walnut beds in the Forest Tree Crop Nursery below Norris Dam, where selected seedlings are grown for plantings on TVA lands.

An extension specialist demonstrates the proper method of topping tobacco to the county agent, Jefferson County, Tenn.

Place empty sticks in racks under table top or in prepared rack; when hand is tied, open and place astride stick fixed for it; place each grade on a separate stick, hands close together, 16 hands on each stick..

*Bulk fuled sticks down time they are filled:* make plank platform; raise platform a few inches above ground; bulk each grade separately; cross sticks about foot from ends—tails inside; when a stick is put down, put a plank on it for

pressing and straightening; pick up plank and put down on each newly filled stick when it is put into bulk; weigh bulk down at night and on non-stripping periods.

*Keep each grade separate:* Have a bulk for each grade or label sticks; partition each grade on the load; put each grade on a separate basket on loose floor.

*Deliver in Good Order.*

## Paradise or Hades?

BY JOHN W. HERSHEY

Forest Tree Crop Specialist, TVA

Should the original pioneers of the Tennessee Valley have come from the tree crop countries of southern Europe, with their sacred respect for a crop of trees, instead of the plow crop countries of northern Europe, we could today have a land which could be called the Eden of America. The steep hills and narrow valleys of the Southern Highlands, with their high annual rainfall and intense heat, truly provide a tree growing paradise! With ideal hands guiding and guarding this tree crop, this valley would sustain a larger population than is here today, in a more healthy condition of mind, body and contentment of soul.

Let us envision these Southern Highlands, with their glorious, natural

Japanese persimmon grafted on the useless wild persimmon sprout.

beauty unmarred by furrow and gully, if for 200 years men had been improving the following tree crops by selection and introduction. Here we would now find:

*Acorns*—Of better varieties, upon which train-loads of hogs could feed, and from which the inhabitants could grind flour and make delicious biscuits, much are made from corn meal.

*Hickory nuts, black walnuts and pecans*—All thin-shelled and rapid-growing, excellent food.

**Delicious Foods**

*Persimmons, American and Oriental*—Of select strains that bear from August until late Fall; fresh, sweet and juicy; dried to store all Winter; delicious dessert strains that could be shipped for city trade; dried ones on which domestic and wild life could feed all Winter. Oriental varieties, as large as apples and more delicious than pastry, also superior hog and cattle forage.

*Honey locusts*—Varieties carrying 1-3 sugar, covering grasslands, protecting them from the burning sun, stimulating grass growth, and producing a crop of food, more valuable than grass or corn, to drop all Winter for cattle forage.

*Papaws*—(northern bananas), large, delicious and high in food value for cattle and wildlife, and a table delicacy.

*Berries*—Such as blueberries, huckleberries, farkleberries, sarvisberries, cherries and wild plums, improved haws and hawthorns, myriads of berry-bearing bushes and trees to sustain a prolific supply of game life. Mulberries—from which so many people profit by feeding

their chickens, hogs, and birds.

Such a picture sounds almost too good to be true, but it could have been.

**Why This Program?**

With the revival of interest in conservation work, the Tennessee Valley will come back with our friends, the trees, supplying perpetual sustenance.

In the TVA's program of building flood and navigation control dams, it was found essential to buy "protecting areas" around the edges of lakes back of dams. To make the best possible use of this area, forestry was turned to as one of the methods to control erosion and utilize the land.

A tree breeding experimental station has been started at Norris where, for the first time, forest crop trees are being bred under controlled methods. Superior trees from all over the world are being collected for observation, study, and selection. This work will act as a yardstick of measurement in a national tree crop development program and can be applied on your farm and mine, with certain modifications as to climate.

The thin-shelled Thomas black walnut. Kernels come out in nice whole pieces.

## Crochet this Smart "Straw" —Yourself

BY MARY BROOKS PICKEN

Many a fashion-wise young lady is making her wardrobe appear twice its size with the addition of smart straw-like hats crocheted from crepe paper. They're easy to make and without trimming, cost only 15 cents, the price of one fold of crepe. Simply cut the crepe paper in strips, stretch and twist them, and crochet as with yarn.

Crepe paper is a millinery favorite. It is durable and inexpensive and available in a variety of colors.

The hat shown is right for any sports costume. For a dress-up event, the pompon may be replaced by a bunch of flowers, and a veil added.

First cut the crepe paper across the grain into strips 3-8-inch wide. Stretch and twist these by hand or with an inexpensive gadget called a twister. The following directions are for a 22-inch head size. The stitch used is: S c, taking up both loops of previous st.

*Crown.* Ch 3, join in loop with sl st. 6 s c in loop. *Row 2.* 2 s c in every st. *Row 3.* 2 s c in every 2d st. *Row 4.* 2 s c in every 3d st. Continue increasing enough to keep crocheting almost flat until circle measures 2½ inches diameter. \*increase 6 st evenly spaced around row\*. Repeat from \* to \* until work measures 4¾ inches from center of top to edge. Work will cup slightly. Next 4 rows without increasing.

*Start Headband.* Next row. Decrease 1 st every 10 st. Next row. S c all around. Next row. S c 9, decrease 1 st every 10th st. Then decrease 1 st every 20 to 25 st. Do not decrease in the same place as in previous row. Continue until a 21½ inch head size is acquired. Work plain until work measures 7 inches center top to edge of brim.

*Finish Hat.* When completed hat will look like a beret. The underneath part (or headband) should be approximately 2 inches wide. With fingers or a warm iron, press the underneath part down flat. Catch it down all around with two rows of wool in a running stitch. Sew 3 wool pompons in place across the top.

Allay your fears about rain. In white or pastels, your bonnet will bear up beautifully; in deeper colors, if you *must* stay out in the rain, an inexpensive water repellent solution can be applied.

## From Every State

TO Washington during the early part of the year, delegates from 36 States and 16 foreign lands—for the third time in the history of the World.

From the time the conference officially opened, the delegates have been busy with their work. A farewell ceremony at the water gate of the city had hardly a spare moment.

High point of the meeting was on Monday when the Secretary of State Cordell Hull and Secretary of Agriculture Charles D. Wickard were both present. Mrs. Franklin Delano Roosevelt was also present at the White House for a garden party at which the delegates were entertained.

"People are prone to forget," said the Secretary of Agriculture, "but the population is actively engaged in agriculture."

"But we are coming more and more to realize that we cannot work in their factories and their stores unless we are independent on them have a greater purchasing power."

Virginia, with 700 delegates, had the largest representation with approximately 650. Maryland, Delaware and South Carolina were all well represented.

Among the more interesting exhibits on display was a miniature farm home made of cornstalks from North Carolina and an exhibit of cross-stitching from Maryland.

(Above) Club-house constructed by the members of Home Demonstration club, Wakefield, N. C. (Below) Mrs. Theo. B. Davis standing behind two of the leaders of this progressive organization, Mrs. D. S. Joyner and Mrs. S. H. Hoyle. (Photo by J.P.D.)

## THE CLUB HOUSE ACTION BUILT

(North Carolina Home Demonstration Club Gets Real Results)

When progressive members of the Home Demonstration Club of Wakefield, N. C., wanted a real club house, they answered their own demand with action. Led by Mrs. S. H. Hoyle and Mrs. W. A. Joyner, they went into the woods, selected trees and then went to work on the logs with drawing knives, hatchets, old froes and mattocks. Food sales, a play, along with fair prizes and other funds went into the club's building treasury. Business firms and husbands helped, too. The result is shown in an accompanying picture. The main room of the house is 18 by 30 feet. A kitchen at the back forms a "T." Because of the interest and help of D. S. Joyner, the club was named in honor of his wife, "The Genia Joyner Home Demonstration Club." "Didn't we have a good time doing it!" say the hard-working ladies now.

## COTTAGE CHEESE SANDWICHES

The hostess who enjoys serving delicious sandwiches will find cottage cheese as a sandwich spread, the next to best thing.

One cottage cheese sandwich which is especially good is made with mustard and cottage cheese. Try it and see if you like it.

*Cottage Cheese Sandwich:* Use white bread. Spread the bread first with mustard; then cover with cottage cheese. Top with sliced nuts, olives, pimientos, dates or raisins.

If you prefer the open faced sandwich with cottage cheese, use white bread.

*Cottage Cheese Canapes:* Cut bread in small squares. Spread with mustard and cottage cheese. Top with olives, caviar, pimiento, or stuffed olives. If you prefer, force the cottage cheese through a potato ricer.

## Wardrobe Chic for Midsummer

TEXAS CENTENNIAL Pattern No. 9708

The Texas Centennial and Spanish trend in spectator sports wear, is illustrated by Universal's lovely Priscilla Lawson. Lines conform to simple treatment universally demanded by style-lovers and a bolero characteristic which is taking the world by storm this season.

Pattern designed for sizes 14, 16, 18, 20; 40 and 42. Size 16 requires 4 3/4 yards of 39-inch material for the dress, and 3/4 yard for the bolero. Scarf and belt require 3/4 yard.

SUMMER SPORT FROCK Pattern No. H-3124

A lovely day, a lovely lady, and a lovely frock combine to make this exquisite picture of summer charm and beauty.

Pattern available in the following sizes: 34, 36, 38, 40, 42, 44 and 46. Size 36 requires 4 3/4 yards of 39 inch or 4 3/4 yards of 35 inch fabric.

PATTERN NO. H-3167 Trimmed in Pique

Universal created this superbly graceful frock of a royal blue shade of crepe for the lovely Ann Preston, and it is brought to you here in pattern form as a fetching contribution to your summer wardrobe.

Easily made with the assistance of the detailed instruction chart supplied with each pattern, it is offered in the 12 to 20 range and features a deep, inverted pleat which runs high for fullness yet retains the slimming hipline. White pique, in striking contrast, fashions the collar and bows, the top being tied through a fan-shaped piece cut in the blouse.

Pattern available in sizes 12, 14, 16, 18 and 20. Corresponding bust measurements 30, 32, 34, 36 and 38. Size 14 (32) requires 4 3/4 yards of 35 inch fabric with 3/4 yard of contrasting pique.

Patterns of dresses pictured above 25c. Please remit in coin or stamps. Give your name, address, pattern number and size. Mail order to Pattern Department, State Farmer Section, Scenic Bldg., Asheville, N. C. A 32-page Summer Pattern Book is available at 15c each, or, if bought in combination with pattern, 35c for pattern and book.

Milking time at Springdale Farm near Spartanburg, S. C. Milk is carried through sanitary pipes to the milk bottling room adjoining, shown in illustration to the left. Within a few minutes, from the time the milk leaves the cow, it is cooled and bottled. When a cow is milked, the gate in front is opened by the operator by means of a lever, the cow walks forward and out to her barn or feed lot and the gate closes. The rear gate opens and a cow coming in to be milked takes her place in the stall. One operator can handle from three to five stalls and milker units, and milk from 30 to 50 cows per hour.

Milking parlor of Col. T. L. Huston, Butler Island Dairy near Brunswick, Ga., located alongside the Coastal Highway to Florida and passed every year by thousands of motorists. The business of this dairy has grown steadily. An attractive roadside stand at which products of the dairy are sold is run in connection with it.

## Milking Cows in a Parlor

BY C. L. REISNER

WHOEVER heard of cows being milked in a parlor! Well, it's being done in a big way by some of the finest dairies in the country.

Several years ago at the dairy farm owned and operated by the Bureau of Dairying of the U. S. Department of Agriculture, Beltsville, Md., a room for milking cows was built and equipped with special run-through stalls and a special type of milking machine designed by the De Laval Separator Company.

### Fast Milking

Cows were brought into this room and the milk was withdrawn by the milking machine into glass jars suspended on a scale attached to each stall. Sanitary pipes conveyed the milk by vacuum to the milk bottling room.

Dr. Harris Moak, then secretary of the Certified Milk Producers Association of America, called the room in which the cows were milked the "milking parlor." That name stuck.

One man can operate three to five milker units and milk from 30 to 50 cows per hour. Only a few minutes elapse from the time the milk leaves the cow until it is bottled.

### Help Sell Milk

Milking parlors help sell milk. People like to watch the cows being milked in this way. This provides advertising of inestimable value.

Some progressive milk producers capitalized upon this idea and as a result constructed attractive milking parlors

with large windows, so that the milking and bottling operations would be visible to the public. This feature has proven effective that already substantial businesses have been built around it and existing dairies who have installed this system have almost invariably increased their milk sales. Some dairies having milking parlors report thousands of visitors during the course of the year.

### Use Increases

More dairies are using milking parlors and combine milkers in the Southeastern States than in any other section of the country.

Among prominent users are the Biltmore Farms, Asheville, N. C.; Springdale Farm, Spartanburg, S. C.; Dr. F. H. McLeod, Florence, S. C.; B. H. Darden & Son, Norfolk, Va.; Yoder Bros., Newport News, Va.; Lickingview Farms, Newport, Ky.; Virginia Polytechnic Institute; Winthrop College, Rock Hill, S. C.; Clemson College, S. C., and University of Tennessee.

The milking parlor idea and the combine milking system have done much to elevate and dignify the milking of cows and to attract the attention and interest of the milk consuming public, which undoubtedly should result in a larger consumption of milk.

Just how extensively this system can be used, of course, cannot be known at this time. It does seem, however, that there is a place near every city and good town for at least one milk producing plant of this kind.

In the milking parlor of the Lakeside Dairy, owned by B. H. Darden near Norfolk, Va., shown above, are two rows of stalls and milker units. A waiting room for visitors is shown, upper left. Exterior view is of the building which are located the milking parlor, observation room and milk bottling room.

This attractive milking parlor is on the Suwannee Farm, owned by the Florida Milk Co., St. Petersburg, Fla. In 15 months more than 75,000 visitors came to the farm to see this novel method of milking. Right, the milk bottling room.

Milking parlor of John W. Berryhill, progressive dairyman near Charlotte, N. C. The three-unit combine milker can be seen through the windows above. Right, milk bottling room, which directly adjoins the milking parlor.

Milking parlor and Combine Milking System of Lickingview Farms, Newport, Ky., where certified milk is produced.

Milking parlor and Combine Milker installation on the dairy farm of the Virginia Polytechnic Institute, Blacksburg, Va. Right, exterior of the milking parlor, which also has an observation room for visitors.

# Agricultural Brevities

**Cotton**  
Cotton breeders are working to bring to the cotton field the "blood" of an American Indian cotton, that has only one important good quality—exceptionally fine fiber.

Recent tests have revealed that strength and wearing quality is associated with fine fiber, as much as it is with long fiber. Heretofore growers and spinners alike highly prized Sea Island cotton for its strength, took it for granted that it was the long fiber that was the essential characteristic.

Experiments in the Department of Agriculture have exploded this belief and indicate that strength is more a result of fineness of fiber than of length. In breeding to secure fine fiber, the Department has turned to an almost worthless variety of very low yield grown by Hopi Indians in northeastern Arizona. Now Hopi isn't a market cotton, since it yields only a few pounds to the acre and is generally undesirable. It does have fine fibers remarkably uniform in length and strong.

Last year, the Department crossed Hopi with Acala cotton, a variety introduced years ago by the Department from southern Mexico. The results have been promising.

Officials in the Department point out that a new supply of superior quality staple cotton adapted to American conditions would help to hold and regain the world market against all competitors.

## Export Trade

Chester C. Davis, former AAA Administrator, recently appointed to the Federal Reserve Board, upon his recent return from a two months survey of European markets emphasized the importance to the American farmer of a solution of our foreign trade problem.

In a press statement, he said: "Increase the foreign trade in our farm products and our agricultural problem would fade accordingly—trade is exchange of goods, it has to move both ways—if it does not there is no trade—our government is promoting reciprocal trade agreements—the United States now has concluded 14 of these agreements—eight of these agreements have been in effect long enough to give us some idea how they are working—our agricultural exports to these countries during the first quarter of 1936 increased 25 per cent above the farm exports of the same quarter last year."

## Livestock

Chemical warfare against injurious bacteria, viruses, and parasites has done much to reduce the hazards of the livestock industry, according to Dr. John R. Mohler, Chief of the U. S. Bureau of Animal Industry.

While species of livestock parasites number thousands, through diligent research science has not only devised means of keeping such enemies down, but has succeeded in practically annihilating certain species.

Dr. Mohler points out that the campaign in the South against the cattle tick has reclaimed about 91 per cent of the area formerly infested by this parasite. Eradication of bovine tuberculosis has been so successful that 40 entire states are now practically free from the disease.

Much of the success in these states, Dr. Mohler feels, has been due to the whole-hearted cooperation of livestock owners and public veterinary and livestock officials. He also credits manufacturers of disinfectants and insecticides with having a most important influence by providing chemicals for use against animal diseases and parasites.

A survey of milk consumption in 59 cities made under the direction of the Department of Agriculture discloses that the weekly per capita consumption of whole milk was 2.44 quarts. Nutritionists agree that an adequate standard calls for between three and five quarts a week. The survey establishes definitely the fact that there is a great deficiency in the average amount of milk consumed by a large number of families. The elimination of this deficiency would change the present milk surplus to a milk shortage.

## Tobacco

Funds appropriated for the redemption of tobacco warrants are available until Sept. 1, 1936. No checks can be issued after that date, according to a statement from the office of the Secretary of Agriculture. These funds will be used to redeem tax payment warrants issued to eligible producers of Burley, flue-cure, fire-cured, dark air-cured and cigar-leaf tobacco.

Contracting producers holding warrants eligible for redemption have been urged to file their applications immediately with the tobacco section of the Agricultural Adjustment Administration, Washington, D. C. County Agents throughout the tobacco producing area have been supplied with the necessary forms and regulations. Only warrants issued to producers who signed tobacco production adjustment contracts are eligible to be redeemed.

## Economic Advisor

Dr. John Lee Coulter, former member of the U. S. Tariff Commission, and agricultural economist, has been appointed economic advisor to the Committee on Agricultural Cooperation of the National Association of Manufacturers.

This committee is making a study of the farm situation to give industry a better grasp of the farmer's problem and to encourage a spirit of cooperation between agriculture and industry. The committee is headed by Lewis H. Brown, president of Johns-Manville Corporation.

Dr. Coulter was at one time Dean of the West Virginia College of agriculture. He became chief economist of the Tariff Commission in 1929.

## International

B. H. Heide, secretary and manager of International Livestock Exposition, announces various changes in rules pertaining to feeder cattle to be exhibited at the 37th exposition which will be held in Chicago, Nov. 28 to Dec. 5 of this year.

The exposition will have a sifting committee to inspect single steer entries. The least worthy entries will be elimi-

nated and sold on the open market. According to Mr. Heide, this procedure will work to the benefit of exhibitors whose animals have no chance of recognition.

## Modernizing

During the past 12 months, the Department of Agriculture has had calls for 250,100 copies of Farmers Bulletin 1738, which contains sketches and floor plans of 40 houses, and there have been innumerable requests for other government bulletins providing information in building and modernizing.

The Department has two new bulletins issued this year: Farmers Bulletin 1749, "Modernizing Farm Houses," containing plans, photos and sketches of 13 typical farm houses remodeled by their owners, and Farmers Bulletin 1751, "Roof Coverings For Farm Buildings and Their Repair," which discusses shingles, bituminous coverings and canvas for roofs.

In the farmhouse plan bulletin are plans for one story "growing houses" of two or three rooms to which additions can be made readily. There are houses for every section of the country. Working drawings with all necessary dimensions and details for building are available from extension services of state agricultural colleges at a small charge

to cover printing and mailing.

The modernizing bulletin, in addition to floor plans, photographs and sketches of typical farmhouses, contains descriptions and costs of the work. Discussions cover electric power, heat and installation, water supply and plumbing, etc.

## Ticks

Recent cases of Rocky Mountain spotted fever near Washington, D. C., emphasize the need for vigilance against wood ticks that spread this disease, warns Dr. F. C. Bishopp of the U. S. Department of Agriculture.

Fortunately, Dr. Bishopp says, only a small proportion of these common ticks are infected. The disease, however, is widespread and has a high mortality. In the East, infested ticks are known to occur in Maryland, Virginia and North Carolina. A large percentage of the cases of spotted fever have been in Maryland and Virginia in the vicinity of Washington, D. C., and in North Carolina.

Ticks are unusually abundant in the East this year. As many as 100 have been picked off a dog at the end of a day in the woods. Ticks are most numerous in the early Summer. Usually they practically disappear by Aug. 1, making the late Summer safer for camping trips and hikes.

Dr. Bishopp points out that ticks are not likely to transmit the disease unless they remain attached to a body for at least six hours.

## Minerals

Isaac Van Horn, Editor of *The Southeast Miner*, calls attention to the opportunities open to many farmers to increase their cash income by the exploitation of various mineral deposits on their farms. In this respect Mr. Van Horn says:

"In almost every section of the farming districts of the Southeast, are located minerals of commercial value if they were developed—these deposits are receiving practically no attention whatever.

"We wish to give an illustration—A farmer in Buncombe County, North Carolina, who for 25 years had plowed around a stony section on his farm; he visited us and upon our advice at spare times, did enough work and secured samples, which he had assayed and the result is, the value of his farm today in mineral being produced is far more than he ever dreamed his entire farm was worth; yet, it is an extra crop because his agricultural lands are undisturbed.

"Such work will in this area in many cases develop great values in the metallic minerals, such as Gold, Silver, Copper, Lead, and many others.

"It may result in finding Brick Clay, Pottery Clay, Mica, Feldspar, Sandstone, Building Stone, Gravel, or a hundred other non-metallic minerals."

# Dairy Industry Grows In Tennessee

By A. S. EDWARDS  
Dairy Mfg. Specialist, University of Tennessee

DEVELOPMENT of the dairy industry in Tennessee cannot be better emphasized than by calling attention to the achievements of butter-fat producers in recent national competitions.

During 1935 there were 58 entries from 15 Tennessee creameries entered in various contests. The average score was 92.82. The national average score for Tennessee entries was 93.04, placing second in the competition rating.

**Larson 1935 Champion**

Only a few years ago, Tennessee buttermakers labored under various handicaps. Not the least was the standard of dairy cows. Another problem, was uniform grading. Since 1927, creamery operators have employed a four day cream grading method. With the cooperation of state agricultural authorities and

the University of Tennessee Extension Service, this grading system is being maintained with fair success.

To Herman Larson, of the Bradley County Co-Operative Creamery, Cleveland, goes 1935 honors as Tennessee's master buttermaker. Mr. Larson made an average score of 93.48. This score was the highest in the five years the competitions have been sponsored.

**Started in 1931**

Close behind Mr. Larson was Thomas Hardison, Marshall County Creamery, Lewisburg, with an average of 93.45. In three national contests,

Tauvie's Gift, owned by the Middle Tennessee Experiment Farm, Columbia, yielded better than three pounds of butter a day.

Mr. Hardison averaged 94.25.

H. Coleman, Rutherford County Creamery, Murfreesboro, was third with 93.25.

The butter making contests started in 1931. Sponsored by the University of Tennessee, we prevailed upon leading creamery men to compete with standard better known for dairy production. The butter maker must enter his product at least three national, and two regional contests. In 1931, the state's average score was 91.78.

## Stars Fell on North Middletown

BY C. A. LEWIS

TWO momentous events occurred in North Middletown community, Bourbon county, Kentucky, in 1833. In October, the people of the community compromised their differences and organized a union church that continues to this day to serve every spiritual need. In November, occurred a meteoric storm of falling stars known in astronomic history as "the falling stars of 1833."

The year of 1833 marked an epoch in the history of the region. Covering the countryside were numerous revivals and protracted meetings. At the Cane Ridge church in Bourbon county a great revival continued, some histories say, all Summer, attracting 20,000 persons. Alexander Campbell, founder of the Church of the Disciples, toured the region. Then came Asiatic cholera, killing hundreds.

**Started in 1833**

The North Middletown community is served by one strong, vigorous, active

church which does its work efficiently and satisfactorily at a minimum cost per individual. The community is approximately 10 miles across extending in a five-mile radius from the village of North Middletown.

**Free From Debt**

The North Middletown church came into being in 1833 a union of factions who had been meeting in Bethel church a few miles east of the village on the Prescott Turnpike. Until about 30 year ago a sprinkling of denominations remained in the community. The Methodist church burned in 1903 and was not rebuilt.

In 1913, the present modern plant was dedicated. In 1917, the Rev. F. M. Tindler, one of Kentucky's famous country pastors, became the minister. There are 700 names on the church rolls. Four hundred men, women and children attend Sunday school.

The church always has kept free from debt. A committee handles the finances. The annual budget of \$5,000 to \$6,000 is raised without difficulty.

The modern North Middletown church traces back to 1789, when the Bethel church was built of logs.

## Youngest State Champion

The Holstein-Friesian Association of America recently accorded to John Elmer Kalmey, Jefferson County, Ky., the honor of being the youngest 4-H state champion Holstein raiser. He is 12 years old July 5. In the following article, John tells how he became interested in the big black and white dairy animal.

BY JOHN ELMER KALMEY

Exactly when my interest in livestock and 4-H club work began is hard to say. When I was four years old my father bought a purebred Holstein bull. The owner reserved the right to exhibit him that year. I was present when he won a blue ribbon at the Kentucky State Fair. Noticing my interest, the owner gave me the ribbon.

The same year, my father bought some purebred heifers, and told me I could have one. The one I picked was my champion cow last year.

My first 4-H club work was in 1934. With two heifers, I won two blue ribbons at the Jefferson County fair and

second and third at the Kentucky State Fair.

In the county show, a cow and two heifers won a championship, two blue ribbons and one red ribbon. I showed three heifers and a bull calf at the State Fair last year, winning a championship, a blue ribbon and a red ribbon in the 4-H club classes and placing third in the county group class. In the Kentucky class, I took a blue ribbon, two red ribbons and one white ribbon.

In the last two years, my Holsteins won \$114 in premiums. I plan to show five females and a male this year. My champion cow, tested in a dairy herd improvement association, has averaged 426 pounds of butterfat and made a profit of \$136 a year. I am saving money to buy a calf from even higher producing stock.

I want to study agriculture in college. I give to 4-H club work and county agents credit for much of my success. To all boys and girls, I say that 4-H club work has been most interesting and profitable.

John E. Kalmey

# gin Culling This Month

July is the month to begin culling the poultry flock. Most hens lay well in the Spring and early Summer, and for that reason, suggest poultry experts of the Kentucky College of Agriculture, is not advisable to try to cull during that time. In July and August, however, there are certain characteristics which indicate the poor producers.

(1) A hen that molts early, does so, because she has stopped laying. These hens take a longer time to grow their new feathers.

(2) The yellow color in the beak and shanks fades as the hen lays. Hence, yellow color at this time of year is an indication that the hen has not laid eggs recently. If the color has faded out, the hen has been laying heavily. Allowance should be made for the return of color in hens that have hatched and brooded chicks.

**Record Cited**

(3) A laying hen has a large, moist vent and width (two fingers) between the pelvic bones. The abdomen and pelvic bones are soft and pliable.

(4) A high producer has a wide back, carrying this width beyond the hips to the tail head, three to five fingers width between pelvic bones and end of breast bone, and a bright, clear, prominent eye with eyelid free from fat.

The Kentucky poultrymen cite the record of a 200-hen flock in Missouri as showing the value of culling. Hens in this flock that quit laying and started molting in July averaged 109 eggs in the year, and took 182 days off; that is, it was 182 days from the time of laying the last egg before molting to the first egg that Fall or Winter.

**Wisdom Shown**

Hens that quit laying and started molting in August averaged 134 eggs and took 151 days off.

Hens that quit laying and started molting in September averaged 137 eggs and took 143 days off.

Hens that quit laying in October averaged 153 eggs and took 94 days off.

Hens that quit laying in November averaged 171 eggs and took 69 days off.

Hens that quit laying in December averaged 174 eggs and took only 45 days off for the molting period.

The record of this Missouri flock points clearly to the wisdom of getting rid of early molters.

## KEEP YOUNG TURKEYS AWAY FROM CHICKENS

Keeping turkeys away from chickens is the most important precaution to take in preventing blackhead, advises A. J. Caldwell, University of Tennessee Extension specialist.

Chickens are known to be carriers of blackhead. Artificial incubation and brooding offers one of the best means of preventing blackhead. By this method, turkeys can be grown on ground known to be free of infection and can be kept away from chickens and old turkeys.

A good layer. Note the strong, deep body, broad back, prominent eye, and general up-standing characteristic of this bird.

Home on the Range! Daddy Gander's in full charge of this family of chicks at the home of Mrs. Bedford Chaffin, near Baxter, Tenn. What's more, according to Mrs. Chaffin, this fatherly gander fights inquisitive visitors who come too near to the 20 incubator hatched chicks, who've taken a real liking to him as their custodian.

### BABY CHICKS
