"Did you hear that Tom is going to be inducted into the Army next week, Judge?"

"Yes, Frank told me this morning down at the barber shop. Our town's got a lot of men in the service now, Jim. In fact, all towns have. I was just reading in the paper where there are more than 10,000,000 men away from their homes in the armed forces. And, from all reports, they're doing a grand job bringing victory closer every day.

"We folks at home have a mighty big obligation to those 10,000,000 fighting men. We've got to produce the food to keep them

well fed. We've got to keep them supplied with the ammunition and equipment they need to finish their job. We've got to help the Government pay for all these supplies our men need by buying more and more War Bonds. We'll have another big chance to do that by helping to put the 5th War Loan drive over the top, Jim.

"And, in addition, we must be sure tha while they're away and can't express th opinions, we don't go voting on and decidi any things that will displease them wh they come back.

Sure's a lot of talk going around nowadays about post-war plan-ning...folks passing resolutions . statesmen holding conferences . . . governments making promises to each other.

But as Bert Childers says: "What good is all this drawing up of plans unless each one of us decides to make his corner of the world a better place to live in?"

From where I sit, Bert's put the problem in a nutshell. Governments can pass all the resolutions and make all the treaties

they can think of-and it's still up to the people themselves to see to it that the world is ruled by tolerance and understanding.

Unless we make up our minds to respect the other fellow's rights and liberties-whether it's the right to enjoy a glass of beer occasionally or the right to vote according to our conscience -all our post-war planning won't be worth the paper that it's printed on.

It's Don's story. But the name could just as well be Walt or Jim or Bob or any other.

· And, of course, the fifth entry in the little address book really hasn't been written yet. But it will be - and we hope to have a hand in making it come true.

. When Don and millions like him went to war, they were given the best weapons and equipment in the world. Equipment turned out fast by machines that were turned by plentiful, low-priced electric power.

. When these boys come home again, electric power will be ready in even greater abundance - to serve new industries and create new opportunities. For power makes production - and production makes jobs.

· The electric light and power companies are prepared for peace as they were for war - thanks to foresight, planning and sound business management.

• They're keeping rates low as costs rise. And they're supplying well over 80% of America's electric service - the best, as well as the most, that any nation enjoys.
