They Rationed Everything

The Pilgrims knew they were ill-prepared for one of the cruelest winters that resolute men, women and children ever had to face. Foreseeing trials that would challenge their endurance, they treasured their scanty store of food and rationed every helping.

But, when a Spring and Summer of strenuous labor rewarded them with an abundant harvest, the Pilgrims were gratefulbut not alone for food. They felt they were well on their way toward an established home in a new world, bright with freedom, security and a promising future for their children. America's goal has never changed. And for such a goal rationing is a small price to contribute. "Food Fights For Freedom".

If a wounded lad home on a furlough, Should drop in to see you tonight, Could you honestly say you are doing Your best to help him in the fight? INDUSTRI

THE speed at which American industry responded to the country's demand for the production of war materials astonished the world and most of all the Axis nations. When they planned treacherous war on unprepared nations-blitzkrieg or "lightning war" as they call it, they underestimated one important thing-the thunderbolt of ma-chine production that will destroy them. With unbelievable rapidity, our men and machines have produced ships and planes and guns. They were able to do this because when war struck, ample electricity was ready and waiting to drive the machines. It was waiting because far-sighted business management in the electric power industry planned well in advance of the demand and millions of electrical horsepower were ready to pour energy into the machines that make the weapons of war.

Think of it! More power in the United States than the Axis nations and their satellites combined and over 80% of it produced by business managed electric companies.
