WRITTEN DOWN"

The papers tell us the Bible has taken another beating which, in some circles, is more politely known

Why? Because, many good folks who have accepted the King James version as a rule to live and die by will be surprised to learn, there are inaccuracies and misleading portions in the King James version—so says Dean Luther A. Weigle who, with 30 other scholars, has labored 15 years to get the "record straight."

Further explains Dean Weigle: "The Bible is not merely an historical document and a classic of English literature but the word of God, and that word must stand forth in language that is clear and meaningful to the people of today."

How touching! To what depths of ignorance have the allegedly enlightened people of this modern age sunk that the language of this classic must be "written down" for them? Should Shakespeare be revised so that "he who runs may read?" Personally, I have always found some of Burns' poetry the Scotch dialect mystifyinganingful but not clear—but ldn't dare suggest it be re-writin common, unmusical words. sides eliminating the last verse Lord's Prayer—"for Thine is March 1 the glory, amen"-the revision compeace, good will toward men," to read, "Glory to God in the highest and on earth peace among men with

Its first Pandora's box was Wheelwright.

The neighboring county of Johnson already is at work. Its County Judge, other officials and citizens were in Frankfort last week, petitioning Highway Commissioner Watkins to build a road from Johnson county (presumably via Van Lear) to Dewey. They may have attained some measure of success; we do not know. If they did, we have no remonstrance to make-only, we would remind officials and citizens of this county that they have keen competition in Johnson county, competition they cannot meet without keeping alive to the situation as if affects Floyd county.

There is no reason a higher type high-way cannot be built from the Mayo Trail, near here, via Auxier to the site of the dam. The roadbed built by the Works Progress Administration remains; some of the surfacing is still there. Needed is a widening of the route, improvement of some of the grade-and, lastly, bituminous surfacing.

This is not setting the sights too high. The state can afford to complete such a route, certainly, if it can start from

scratch and build entirely new roads.

If you think there is plenty of time, that there's no need to rush the matter, remember that our neighbors are quite sensibly in a hurry. Pike county already has a road several miles down Johns Creek. Johnson county is determined to have one up the stream to link Paintsville with the dam, a future mecca for sports-

Floyd county's fiscal court has been progressive enough to pledge its help to complete a road to the dam, but it should immediately enlist state aid to make this a permanent road and one which can accommodate the heavy traffic that one day will be traveling to and from the

LET'S TAKE STOCK NOW

Everybody wants goods.

Manufacturers want to make them for you.

Yet months after the war's end, you still find it difficult to get many of the things you want and should have.

So, isn't this the time for all of us to take stock . . . to learn a lesson . . . to find out, if we can, what will cure the troubles we are having and prevent their recurrence?

Let's look ahead and agree on a program that will insure the full production everybody agrees is the real answer to most of our problems.

Suppose we begin by taking a good look at three roadblocks to prosperity...

STRIKES

Whatever their justice or injustice, strikes paralyze production, force people to use up their savings, and result in losses that can never be made up.

PRICE CEILINGS

Full production isn't possible when industry suffers losses because of rising costs and frozen prices. Price ceilings limit production - goods just don't get made.

GOVERNMENT SPENDING

Continued huge government spending means continued high taxes. High taxes discourage production, hinder the creation of jobs, and leave you less to spend.

ISN'T THIS THE WAY?

The people, through Congress, can remove these roadblocks in the longrange interests of all

By establishing a labor policy that will treat labor and management exactly alike, and above all be fair to the public;

By removing the shackles of price control on manufactured goods;

By cutting down on government spending now and balancing the Federal budget by the 1947 fiscal year at a level of income and outgo that taxpayers can stand.

Do you believe this program is in the public interest?

Your Representatives in Congress are the only ones that can put it into effect. Tell them how you feel about it.

Profits Mean Progress

If someone offered you a deal which

1% of the price your steers, hogs, or

lambs sell for, we doubt if you'd get

very enthused about it. The profit

margin would be too small-about

35¢ on a \$35 hog, or only \$35 profit on 100 hogs.

Swift & Company makes thousands of such very

low-profit deals every day in the year. At the end of

the year 1945, for instance, we came out with a profit of only 9/10 of a cent per dollar of sales on our total

and many of its products are very perishable. But

like you, or any other able businessman, we want to make more profit than that 9/10 of 1% on our busi-

ness. Profits mean progress, and in order to progress,

everyone-producers and meat packers alike-must

receive more than barely enough to meet expenses.

Producers of livestock and other farm products got

75¢ of each dollar we received from the sale of all our

products, including hides, wool and all by-products. You may well ask, "Where did the remaining 25¢ of that dollar go?" The answer is: 12.3¢ went to all plant

and office employes who prepare and market these

farm and ranch products; transportation took another

2¢; supplies (fuel, barrels, boxes, salt, sugar, etc.) cost 5.1¢; taxes, 1.4¢; other necessary expenses 3.3¢. And

that left just 9/10 of a cent out of the average sales

dollar for the development and protection of the busi-

ness and as a return to

MINERAL SUPPLEMENT FOR WINTER FEEDING CATTLE

We Turn to Fundamentals

When the Going is Tough

by Professor A. E. DARLOW, Oklahoma A. & M. Professor Darlow is at present at Shrivenham American University in England, helping to rehabilitate the agriculture of war-torn Europe. The importance of agriculture and agricultural production was certainly

impressed on the average Briton during the war. Food and food production for fighting men and working women were items of first importance. The English farmer did a marvelous job of increasing and maintaining Many have thought that all the effort was on crop production. This is

not the fact. Despite the need for all the human food it was possible to produce, the farmers and breeders of Britain have maintained their herds and flocks. There were some shifts and changes in livestock production, but the importance of livestock to agriculture and the importance of livestock production to human welfare were never more fully

Here is a lesson for us all. It isn't theory, but fact brought into sharpest focus in a people's fight for existence—that nothing is more important to a nation's economy than her agriculture, and nothing is more necessary to good agriculture than a balanced livestock program.

It has long been known that minerals are necessary for the health of animals and even for life itself. Those minerals most likely to be lacking in winter feeds

are calcium or lime, phosphorus, and common salt. Many of the roughages fed to cattle may be short in minerals or grown on soils of low fertility. When cattle are fed such feeds, they must be supplied with a mineral supplement containing salt, lime and phosphorus. Also valuable in this mineral supplement are small quantities of other so-called "trace elements" such as cobalt, iron, manganese, copper and iodine. Although only small amounts of these latter minerals are needed, each plays a part in building a strong, healthy animal.

New Paths for Long Distance!

To take care of the continued heavy volume of long distance calls, thousands of miles of long distance circuits are being added to the South's telephone

As construction work progresses, calls now sometimes delayed, will begin to find new paths. In the meantime, if your call happens to be delayed, we hope you will understand. We are faced with a big

job that will take a lot of time and money to complete. But we are going at it eagerly and efficiently with every resource at our command.

The only reason he could have changed his mind was that probably ne just caught sight of their "Lame badges and decided it was worth while to steer them to jail. I got worried about the boys when the ast bus ran from Prestonsburg and the boys didn't show up, so on the early bus to Prestonsburg I went, found out from inquiry they were in ail. My son was charged with breach of the peace. I asked the Jailer if that meant he showed fight or resistance of the officer that arrested Hall if he could go home as he wasn't drunk or couldn't think or ee anywhere that he had violated he law. So Hall had him booked as breach of the peace, fine \$10 and the other boy \$19.75 drunken fine. The fines were paid after a dismal night in jail. I personally asked different people in Prestonsburg if they noticed these boys. They said if they were drunk or disorderly they didn't notice. I asked the boys if they had breakfast. They said the man brought them up gravy and two slices of bread and a pot of coffee and no cups to drink it in. Take it all around, the boys and folks who know what treatment they got at their county seat after fighting and doing all they could for free speech and liberty, the goal they thought they were fighting for, it sure was a let-down. The service they got at the county jail, which the taxpayers maintain, they were refused a phone call to their folks at home to let them call and tell what happened to them, although the boys had \$250 in money on them and wanted to pay the charges. If they had been allowed to call me I could have saved a miserable night for them in the
