Drops 1st Game**

The Prestonsburg Black Cats, as of Wednesday afternoon, had broken even in two games over the past week, defeating Martin here last Friday night, 42 to 37, and losing on the following night at Wheelwright, 30-29.

Both games were hard-fought and in neither was the issue decided early, although in the game with Martin the Cats jumped off to a first-period lead that the visitors never overcame.

Wednesday night, the Black Cats went to Pikeville for their first meeting of the year with the Pikeville high school Panthers. Friday night, the powerful Wayland team comes here and on the following night the Cats visit the Betsy Layne Bobcats.

The Prestonsburg VFW team dropped from the unbeaten ranks Tuesday night with a 49-41 loss at Garrett to the Garrett Vets. "Turkey" Hughes with 25 points led the Beaver Creek team in achieving what no other five of the section has succeeded in doing all season.

Going backward, the Prestonsburg VFW team swamped Betsy Layne there Tuesday night, 70 to 36; last Friday night, defeated Martin, 72-23, and Thursday night defeated Wheelwright here, 54-35.

**Court Splits Insurance  
Among Three Agencies**

The \$102,000 total insurance to be in effect on the Floyd county courthouse has been split three ways this year equally distributing the business among as many local insurance agencies. The fiscal court last Friday completed the allocation of the business.

Dec. 16, the court renewed \$34,000 of the total with the Sparlin Insurance Agency; then last Friday, it purchased \$34,000 from the Archer Insurance Agency and \$34,000 from Allen, Hall & Spradlin, with \$11,000 more to be procured through the latter firm July 1.

Contract for construction of a bridge at the Big Branch of Abbott Creek was recently awarded by the court to J. G. Porter, Prestonsburg, in his bid of \$980.

**Floyd Man, Instructor  
At Nation's Artillery Center**

Ft. Sill, Okla., Dec. 26 (Sp.)—T/Sgt. Clarence D. Newberry, Auxier, Ky., is on duty with headquarters, 17th field artillery battalion, here at the nation's artillery center as an instructor.

Sgt. Newberry, who enlisted in the regular army in May, 1934, was first assigned to Company I, 10th Infantry Battalion, Ft. Thomas, Ky. In April, 1945, he was stationed at Ft. Sill as a cadre-instructor in the replacement training center. Later he was made instructor in gun mechanics and platoon sergeant.

Prior to entering the service, Sgt. Newberry, a former student at Prestonsburg high school, was a miner and hammersmith employed by the Park Drop Forge Company, Cleveland, O. Mrs. Newberry and their two children, Madeline, 7, and Larry, 2, live in Auxier. Mrs. Newberry is the daughter of Mrs. L. D. Clarke, of Auxier. The sergeant's parents, Mr. and Mrs. V. B. **1980 Vets Claim  
Unemployment Pay**

Frankfort, Ky., Jan. 4, (Sp.)—Jobless benefits in the Prestonsburg area totaled 2,401 for the week ending December 21, the Kentucky Unemployment Compensation Commission reported today.

Industrial claims numbered 264, interstate 157, and veterans' 1,980. Total claims were down 1,023 from the previous week's figure of 3,424, but this was attributed to the fact that some of the area's heaviest claims-taking points, visited bi-monthly, had not been visited during the week covered in the current report.

**Owsley Farmers Say  
Tire Drainage Pays**

How big crop yields soon pay for tile drainage is told by County Agent H. M. Williams in Owsley county.

W. H. Gibson harvested 98 bushels of corn to the acre on land tile-drained in 1945. Treated with limestone and phosphate and kept in mow two years, it was plowed in the fall of 1945 and sowed to oats, lespedeza and other legumes and grasses.

On 4.65 acres where the oats crowded out the other crops, Ky. 102 hybrid corn was planted in the spring of 1946. A total of 456 bushels of corn was picked.

Fred Peters tile-drained land that had been a swamp as long as the oldest citizen could remember. Corn on it produced 50 bushels to the acre in 1945 and 80 bushels to the acre in 1946.

On Claude Duff's farm, where 10 acres are being drained, corn yielded almost 100 bushels to the acre in 1946 on three acres where the drainage system was completed.

If tile could be had at least 20,000 feet would be used in Owsley county in 1947, Williams said.

Approximately 85 per cent of the veterans receiving self-employment allowances from Veterans Administration are farmers.

## Business and Financial Outlook for 1947

By ROGER W. BABSON

### 1947 IN A NUTSHELL

- BUSINESS**—To reach higher levels than recorded in 1946.
- COMMODITIES**—Opposing trends.
- LABOR**—Some basic problems to be solved.
- REAL ESTATE**—Continued good demand for modern suburban homes.
- POLITICS**—Increased foreign troubles.
- STOCKS**—To work higher.
- BONDS**—Firmness temporary.

1. One great event of 1947 will be a beginning of a movement of population from the big coastal cities to the small interior cities, unless definite steps are taken for world disarmament.

2. A year ago the U.S. Babson chart registered 130. Today it is estimated at 160. The Canadian Babson chart registered 190 a year ago. Today it is estimated at 204. Sometime during 1947 these charts will register higher figures.

3. Reconversion of industry from war to peace has been completed, although the great government surpluses have not yet been disposed of, leaving more to be sold in 1947.

4. Inventories, quoted both at their price values and their volumes will increase during 1947. Both raw material piles and manufactured goods will be in greater supply in 1947.

**COMMODITY PRICES**

5. Some rationing and priorities may continue into 1947 but both will rapidly be eliminated. Government regulations will gradually be lessened. World War II will officially be ended.

6. Retail prices of most manufactured products will be higher sometime during 1947 than at present. The prices of some of the food products may decline.

7. The unit sales of some department stores will begin to decline sometime during 1947, but the sales of food and variety chains may continue at peak figures.

8. The great question mark of 1947 will be how labor is to behave. Higher wage rates and less production per man inevitably mean higher prices.

**FARM OUTLOOK**

9. Pending a weather upset, more bushels of corn and wheat and of some other products will be raised in 1947 than ever before in our history. Although some prices may slide off, the total farm income for 1947 should hold up fairly well. But farmers should diversify more in 1947.

10. There should be an increase in certain fruits, fish products and vegetables with a decline in prices. The United States will have more to eat in 1947 than in 1946, probably 10 per cent over the prewar level.

11. Dairy and dairy products will continue to increase in volume with no increase in prices, but fats, sugar and some canned goods will continue short.

12. Farmers will start in 1947 to work to extend legislation on their party program due to fear of a collapse in farm prices.

**TAXES**

13. Taxes will not be increased during 1947; and there should be further reductions. More nuisance taxes may be eliminated altogether.

14. The federal debt will be decreased during 1947 and the federal budget may be balanced by June 30, 1948.

15. The cost of living will continue to rise during 1947 due largely to the lack of interest in their work by so many wage-earners.

16. Providing jobs for returning soldiers at satisfactory wages will be a big political task of 1947. There should be jobs for all, but not at the wages desired.

**RETAIL SALES**

17. The total volume of all retail sales will be about the same as in 1946. Poor quality goods will suffer, but many items now unavailable will be purchased.

18. The total dollar value of all retail sales should exceed 1946 with an increased demand for woolen and cotton textiles.

19. There will be a continued demand for men's clothing and especially for shirts and underwear.

20. Wise shoppers will buy only what they need and not grab to stock up on goods not absolutely required.

**FOREIGN TRADE**

21. The United States will own over 50 per cent of the world's shipping in 1947 and foreign trade will increase.

22. We will continue our policy of making foreign loans, provided the borrowers will agree to spend a fair proportion of the money in America.

23. Both the British Empire and Russia will keenly compete for foreign trade during 1947, but cartels and government monopolies will be frowned upon.

24. Throughout 1947 war talk will continue, the thought being that, sooner or later, England—who truly is in a terrible predicament—will "shoot" to stop further Russian aggression.

**LABOR**

25. Even President Truman's "eighteen and one-half cents" will be forgotten during 1947. The year will be noted for threatened strikes and labor disturbances.

26. Industrial employment during 1947 could be up both in hours and in payrolls, labor leaders' discouraging attitudes notwithstanding.

27. Many industries, now operating on a 40-hour week, will return to a longer week during 1947. There will be no wage reductions and some further advances.

28. The government will try to demand better management and closer labor-management relations. Such prospects are not bright for 1947, but Congress will repeal or amend some of the present labor laws which are very unfair to management.

**INFLATION**

29. The Inflation Era, which we have been forecasting for several years, will be in full swing, but the reckless printing of currency will not come until after 1950. The purchasing power of the dollar will continue to decline.

30. All 1947 wage increases will be distinctly inflationary.

31. Sometime during 1947 production in many lines will have caught up with consumption, people will have spent their savings and then there will be a surplus of goods.

32. If Stalin's health continues good, he will be the world's most powerful man in 1947, even from an economic standpoint.

**STOCK MARKET**

33. The rails may suffer still further declines sometime during 1947. Certain industrial manufacturing and other war stocks will further decline during 1947, but the Dow-Jones Industrial Averages will register higher prices sometime during 1947 than the December, 1946, averages. All depends on how Labor behaves in America and how Russia behaves abroad and upon what the United Nations do as to disarmament.

34. The safest stocks to buy—considering value, income and safety—will continue to be "chain-store" and "recreation" stocks.

35. 1946 saw a large decline in certain stocks compared with the averages. Switching will be the outstanding market feature during 1947. Especially watch for bargains in airline stocks.

36. The stock market will continue to witness creeping general inflation and no evidence yet exists as to whether the "communistic break" in 1946 was the beginning of a real bear market or only a reaction of a bull market.

**BONDS**

37. Although bank loaning rates should continue a slowly upward tendency interest rates in general will remain low through 1947. The money supply is now 25 per cent above normal and government financing demands continued low rates.

38. Anticipating an expected reduction in federal taxes, 1947 should see a further falling off in the prices of most municipal and other tax-exempt bonds.

39. Some high-grade corporation bonds may hold steady but sooner or later will decline considerably. The federal government's 2 1/2's, which once sold above 106, will sell down to par or new 2 1/2's will be offered at par. Investors will give more attention to diversification and staggered maturities during 1947.

40. More public utilities will be taken over by federal and other "Authorities" during 1947. Wise investors will consider this possibility when selecting public utility securities.

**REAL ESTATE**

41. Suburban real estate will continue in greater demand with still higher prices during 1947.

42. City real estate may hold its own due to less available space caused by pulling down structures to save taxes and provide parking spaces—also to disinclination to build due to present high inflationary building costs. The fear of bombing—in case of re-opening of World War II—may also be a factor.

43. Small subsistence farms will continue to increase in price, but large commercial farms may sell for less in 1947 than in 1946.

44. Building will show considerable increase. Contracts will be made up with advancing prices. The present scarcity of lumber, cement, bricks and labor should begin to ease up in 1947.

45. Office and residential rents during 1947 may be expected to increase.

46. 1947 will see the beginning of the real building boom which should have arrived in 1946.

**POLITICS AND POSTWAR PEACE**

47. President Truman now has lost control of Congress and both parties will be playing politics in anticipation of 1948.

48. Our foreign headaches will become worse and more frequent during 1947. What we are going through to re-organize Germany will be repeated in other countries.

49. The Latin-American honeymoon has passed its peak. The attitude of Argentina will extend to other countries. Our South American troubles will continue to increase during 1947.

50. 1947 should see more religious interest, including more church-going, than did 1946. People gradually are realizing that without a Spiritual Awakening no peace or other plans will be much good. Nations cannot be depended upon to co-operate and stick to their agreements unless they recognize God as their real Ruler and Guide. Hence, what good are agreements with Russia?

**RETURNS FROM KOREA**

Staff Sergeant Raymond Pratt, of Garrett, has returned from Korea where he has served with the 80th field artillery battalion for the past 13 months. On his way home from Camp Sheridan, Illinois, he stopped over with his brother, Russell, near Sandusky, Ohio, and enjoyed a few days' hunting pheasant on Russell's farm. This kind of hunting was no novelty to him since Korea has a good supply of ringnecks besides other game. He is spending his terminal leave with his father, E. S. Pratt. He expects his discharge some time this month.

## House of David BASKETBALL TEAM

When the famous House of David basketball team plays here, local fans are in for the greatest basketball treat of the season.

The bearded Davids are recognized as the world's most colorful basketball team and certainly needs no introduction as their record stands for itself. With their beards flowing in the breeze and their eyes cocked on the basket local fans who attend this game will laugh with glee and howl approval at the eccentric tricks and great basketball plays the bearded beauties will employ in order to win another game.

The David Basketeers line up will be studded with basketball stars of some former college greats and the others have proved their calibre in the Professional field. Heading the list will be Bill Steinecke, basketball's greatest clown and long shot artist who has been with the House of David Basketball team for 13 years, graduating from DePaul University, where he was captain and hailed as one of the school's best players of all time. Bill plays a guard position and will keep the fans in an uproar with his antics, such as dribbling and dancing at the same time, comical shooting and passing. Steinecke was a catcher in baseball for the New York Yankees last season and formerly was with both the Detroit Tigers and the Pittsburgh Pirates.

Ham Hamilton, nine year veteran guard with the House of David team, will be alongside Steinecke, and is known as the best passer in the professional field. Ham is a six-footer and can pass from all angles, is a good shot specializing in the coffin corner spot. He is the best defensive player on the squad and always takes the best player on the opposing team. In nine years with the Davids Hamilton has played in 1,643 complete games. Proven to be one of the best ball handlers ever to play during all these games, "Ham" has never missed one minute's play and says he will take a past due rest when he reaches the two thousand game mark. "Ham" is a college man from Florida and is the only southerner on the club. Hamilton and Steinecke start the scoring guard combination in the game. Next in line comes Gordon Burgett, high scoring six foot, three inch forward who has been with the Davids five years, and this boy can show the best a few tricks in the art of scoring points for he has an average of 17 points per game over a five year stretch with a club that plays all basketball teams in the U.S.A. at the rate of 200 games per season. At the other forward will be clever Paul Short 6 ft 3 inch ball hawk. Paul will be serving his second year with the Davids and is a left hander who is a one handed stylist his specialty being to take the ball off the back board bring the ball out a few feet and drop the ball in the hoop. Short is a former college player from California where he set a conference scoring record while in school. Tom "Tiny" Faulkner 6 ft. 7 inch center who balances the scales at 225 pounds will be at center and the big fellow plays the line for the Davidites, is their backboard rebound ace. Faulkner has proven to be one of the best ball handlers ever to play the game and is being tabbed a cinch to be another Joe Lapchick. All in all these players form one of the best teams playing basketball today and will give a good educational and entertaining show assuring the fans of their money's worth when they see them in action.

What are Your Chances for a New Car in 1947?

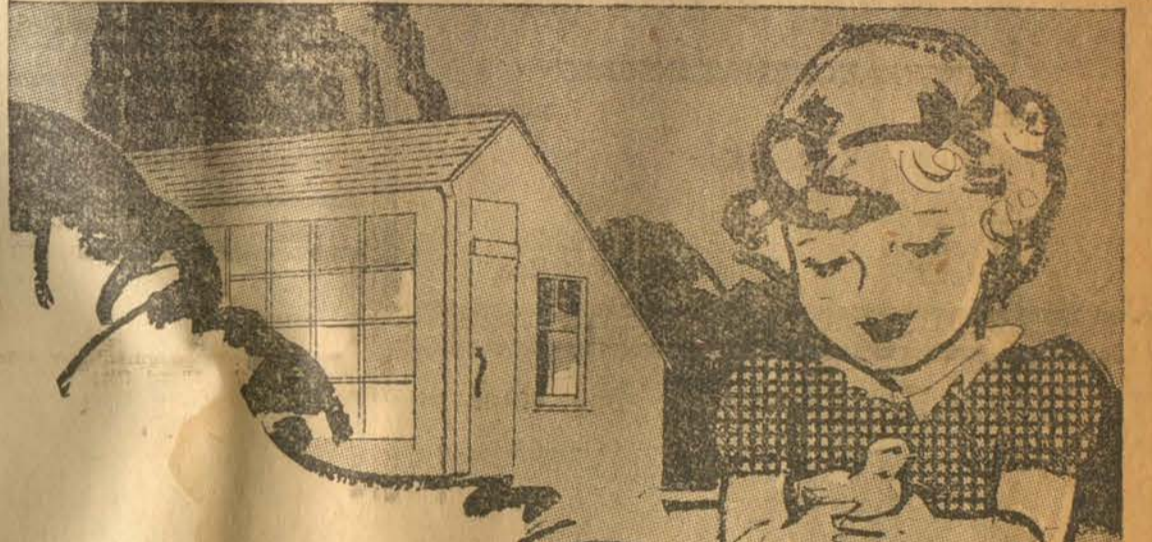

Your chances are one out of two. Most estimates are that there will be only about half enough new cars to meet this year's demands and that it will probably be well into 1948 before everyone who wants a new car will be able to walk in and buy it. Lack of steel will continue to be a bottleneck in automobile production.

While you are waiting for your new car, keep your present auto- mobile in No. 1 condition. Let us check your car and make the necessary repairs. Our 23 years in the automobile business proves we are able to do the job well.

You CAN COUNT YOUR CHICKENS BEFORE THEY ARE HATCHED...

WITH an Electric incubator, one "hen" covers thousands of eggs. The uniform temperature maintained in Electric Incubators gives hatch percentages as high as 92%, eliminates fire hazard, constant fire tending... ends disagreeable odors... fuel and ash handling and cleaning... lets you spend your time in other important farm duties.

The principle of electric brooding is Nature's way—with all the hazards of the hen eliminated. When the first egg was hatched, the chick ate, drank and exercised in the cool, moist air. When he became cold he ran to his mother and was warmed quickly. The same idea is adapted, but with automatic precision, in Electric brooding. The room is left cool and the air is moist and well ventilated with all the heat held under a well insulated cover... eliminating the problems of warm dry room brooding such as feather picking, toe picking, bare backs and pneumonia.

These facts on electric incubation and brooding have been thoroughly proven by practical poultrymen every- where. Kentucky and West Virginia POWER COMPANY

The climax came, Justice said, when Hobart announced he was going to shoot all the war veterans and then drive the bus and the others into the Ohio river.

"You're first," Justice said Hobart told the driver, "but I don't want to shoot you sitting down. You must stand up."

Stillwell had to stop the bus to stand up. Then the passengers jumped Griffith and his brother.

The Griffith brothers were tossed out of the bus and walked down the highway to a garage, where they surrendered meekly.

Municipal Judge Kenneth Cranston, of Portsmouth, Monday set bonds of \$5,000 each for the two brothers.

Neither entered pleas after Chief Deputy Sheriff Burl Justice signed affidavits charging them with the beating of driver C. L. Stillwell and two passengers, and the intimidation of 21 others.

The younger brother was named in six affidavits while Hobart was named in five. Their cases, involving 11 felony counts, were continued till Jan. 20.

Ralph was charged with cutting with intent to kill in addition to five other charges which Justice placed against the pair. These charges included pointing firearms, assault and battery, assault and operating a motor vehicle without the owner's consent.

The continuance was granted after Assistant County Prosecutor W. W. Waldner requested additional time. The bonds were set pending the preliminary hearing.

Mrs. Rachel Stidham, of Jackson, and her brother, Senator Doug Hays, of McDowell, were visitors in Prestonsburg Thursday.

But, Mrs. Salmon, there is no relief in sight from the Legislature. The boys would never agree to the legal limit. Some of those old codgers would want to set the ceiling as high as 20, while some of the younger lawmakers would start a filibuster or hold the limit to four or five.

It may be that this is a matter that merely has escaped the lawmakers' attention while they were attending to everything else. But Mrs. Salmon, an earnest seeker after truth, may have started something.

In Memory of My Niece, Mary Lou Fannin, who died Dec. 25, 1945 at the age of 13 years:

Oh, I remember well the night my sweet, little niece passed away. When she told me she was dying I thought my heart would burst, but Jesus wanted to take her home. The happiest thoughts for all her folks she left behind, was when she told me she was all right with Jesus. She was a member of the church and had been baptised. She was an only girl, with seven brothers left behind. No wonder we worshipped her.

This was the saddest Christmas the following ever had: her mother, Sadie Clark; her brother, Bill Hatfield; her grandmother, Minnie Walters; her aunt, Lizzie Hackney, and myself.

Her aunt, EFFIE STRUNK
